IPO

In this groundbreaking guide, former investment banker Philippe Espinasse explains the process of gathering cornerstone investors in connection with IPOs and other equity offerings. Using his trademark simple and jargon-free language, he details the targeting strategies, documentation, marketing, and allocation of shares and other securities to these reference shareholders, and analyses why and how they make or break today's new listings across Asia's key markets. This essential guide—and the first of its kind—contains key information on the legal framework for cornerstone investors in Hong Kong, Malaysia, and Singapore, and offers practical advice on how best to structure and conduct a cornerstone investor offering. It also discusses some of the more controversial issues associated with the practice of cornerstone investment and includes many real-life examples of cornerstone deals, sample documents, cornerstone investor profiles, an investor target list, and a comprehensive glossary. 'There is no better person to shed light on the opaque world of cornerstone investing in Asian IPOs. Philippe Espinasse writes clearly, substantively, and expertly.' —Jasper Moiseiwitsch, Asia companies and markets news editor, Financial Times 'As engaging as it is informative. Espinasse has cut through legalese and jargon to create a pragmatic overview of this widely misunderstood, and distinctly Asian, investment banking concept. In the last two years alone, the market capitalisation of stocks traded in The Stock exchange of Hong Kong (SEHK) has grown by almost 100%. This growth, reflecting both the appreciation of existing stock values and a flood of new listing, is expected to continue as the PRC develops in to a world economic power. The rising volumes of trading and recent flurry of 'H' share listings and other PRC-backed stocks, is also indicative of the PRC's commitment to establish Hong

Listing by companies from one country on the stock market of another country is a device often used both to raise capital in, and to increase bonding with, the target country. This book examines the listing by Chinese companies on the Hong Kong stock market. It discusses the extent of the phenomenon, compares the two different regulatory regimes, and explores the motivations for the cross-listing. It argues that a key factor, in addition to raising capital and bonding with the Hong Kong market, is Chinese companies' desire to encourage legal and regulatory reforms along Hong Kong lines in mainland China, in order to develop and open up China's domestic capital markets.
