closer grip for triceps).

- **Pull-ups:** Use a sturdy bar at a park or playground if you don't have one at home. Start with negative pull-ups (slowly lowering yourself from a supported position) if needed.

Progressive Overload: The key to continuous improvement in calisthenics is progressive overload. This means gradually increasing the difficulty of your workouts over time. You can do this by:

- **Increasing repetitions:** Perform more reps of each exercise.
- **Increasing sets:** Add more sets of each exercise.

By consistently employing progressive overload, you'll continue to challenge your muscles and stimulate growth even without weights.
