

Inclusive Growth And Development In India Challenges For Underdeveloped Regions And The Underclass Ide Jetro Series

Inclusive Growth and Development in India

India is one of the fastest growing countries in the world. However, high economic growth is accompanied by social stratification and widening economic disparity between states. This book illustrates some important aspects of underdevelopment and the process by which the underclass is left behind by focusing on the country's most neglected regions.

Growth, Disparities and Inclusive Development in India

The book critically examines the high growth trajectory in India, particularly since the late 1980s, a period which is characterized by increasing inequality. Through various studies from the Indian state of Uttar Pradesh -- a state more populous than Brazil and with a GDP comparable to Bangladesh -- it sheds light on the link between growth and inequality in emerging economies. The slow pace of any upward movement in terms of various development indicators in low-income Indian states is due to a number of factors, including their historical disadvantages. Over a period of time, this has resulted in widening disparities, both between different regions of these states, and between these states and other more prosperous Indian states. The book provides a holistic, yet critical, region-wise analysis of the achievements of Uttar Pradesh compared to other states and to India as a whole, in the context of indicators of inclusive development, namely, growth, employment, poverty, infrastructure, agriculture, industry, education and health. Based on the latest data and sophisticated analysis methods, it assesses inequality and development disparities, clearly identifying three major challenges that poorer states face in redressing poverty and expanding inclusive growth Increasing economic opportunities, Empowering
Inclusive Growth And Development In India Challenges For Underdeveloped Regions And The Underclass Ide Jetro Series

poor and marginalised groups to avail new opportunities in a rapidly changing world, and ensuring an effective safety net to reduce vulnerability. The book suggests strategies for promoting high and sustained economic growth, and highlights the significance of broadening social inclusiveness through greater and more rapid access to economic and social opportunities, and building strong social safety nets to protect the chronically poor and mitigate their risks and vulnerabilities with the help of good governance and institutions. With contributions from leading scholars from the region, it is a valuable resource for researchers working in the area of growth and inequality, as well as for policy makers from developing economies around the globe.

Inclusiveness in India

This book examines inclusive growth in a range of social and economic areas in India, including physical infrastructure, vulnerable sections of the population and underdeveloped states. It provides a comprehensive study of disparity and deepens insight into understanding processes of economic and social development.

Inclusive Growth and Development in India

India is one of the fastest growing countries in the world. However, high economic growth is accompanied by social stratification and widening economic disparity between states. This book illustrates some important aspects of underdevelopment and the process by which the underclass is left behind by focusing on the country's most neglected regions.

Inclusive Growth in India

This book details the author's research over the last decade on understanding the need for economic reforms with 'human face' or equitable development. It examines the performance, challenges and policies in four inter-related elements of inclusive growth: agriculture, poverty reduction, human development, and regional disparities. In order to achieve inclusive growth, the book argues for following macro pro-poor and people centric policies.

Inclusive growth in Karnataka-

Inclusive Growth And Development In India
Challenges For Underdeveloped Regions And The
Underclass Ide Jetro Series

Challenges in Poverty, Agriculture, Employment, and Social Sector Development

The Indian growth story has been one of high Gross Domestic Product (GDP) growth but primarily driven by the growth in services sector. Growth may be higher in the last two decades but inclusive growth or equitable development has been missing. Inclusive growth thus seeks to broaden the flow of benefits of globalization towards the currently excluded sections. Economic growth in Karnataka primarily driven by services (55.17%). The Contribution of the industrial sector is smaller which contributes only 16.22 percent to overall growth compared to 30.20 percent at the All-India level. Economic growth particularly pro-poor growth in terms of concentrating on agriculture and employment are important in order to reduce poverty. However, economic growth alone will not be sufficient to lift some people above poverty. Despite achieving the MDG on poverty, a large number of SC, STs will remain poor even if the growth rate is hiked. Karnataka economic growth may be improving but Karnataka is lagging behind southern states like Andhra Pradesh, Tamil Nadu and Kerala. Karnataka is need to operationalize a plan to accelerate growth in agriculture, employment, and social sector development and in
reducing growth and disparities for achieving
Inclusive Growth And Development for achieving Inclusive
Challenges For Underdeveloped Regions And The
Underclass Ide Jetro Series

growth during the 12th Five Year Plan period and beyond in Karnataka. The action plan should cover the priority areas like agriculture, employment and social sectors. It should have a plan for removing economic and social deprivation across all regions.

Between Dissent and Power

This study examines the collective progression of Islamic politics between points of dissent and positions of power. It brings about a more a serious understanding of Islamic politics by critically tracing the pathways by which Islamic politics has been transformed in the Middle East and Asia.

Insights into Inclusive Growth, Employment and Wellbeing in India

What changes are occurring at the macro and the sectoral levels, how the labour market changes are taking place and what impact is felt on the low income households are some of the questions that the present volume focuses on. It begins by examining the sectoral composition of growth, revisiting the issues related to industry-services balance, and also brings out the spatial dimension of growth. On the one hand the industry does not seem to have played a major role in the context of Challenges For Underdeveloped Regions And The Underclass Ide Jetro Series

employment generation as imported technology is by and large capital intensive in nature. On the other hand, the services-led growth is seen to have reduced the pace of poverty reduction. Given the services-led growth the possible impact of trade in services on employment both in the formal and informal sectors have been worked out, indicating limited positive spill-over effects. The labour market outcomes are brought out with great details suggesting that rapid economic growth in India could not result in productive employment generation on a large scale. The gender dimensions of employment are brought out to verify if reduction in labour market inequality can result in improving the position of women in other spheres encompassing the decision making process both within the household and outside the household. Issues relating to urbanisation and rural-urban migration are also covered to understand the dynamics of urban poverty and to bring out the challenges of population transfer given the spatial concentration of growth. The job search practices pursued by the low income households are often pursued in terms of informal networks. What problems are associated with such mechanisms in experiencing improvements in wellbeing levels are covered in the present volume. On the whole, the volume offers an explanation of limited poverty reduction in a situation of rapid economic growth on the basis of an inter-disciplinary framework

Inclusive Growth And Development In India
Challenges For Underdeveloped Regions And The
Underclass Ide Jetro Series

though efforts are being made to keep the methodology quantitatively rigorous.

India's Villages in the 21st Century

Post India's economic liberalization in the 1990s, the village ceased to be central to ongoing sociological concerns. As a result, the period saw a marginalization of rural life and agrarian economy in the national imagination. However, in the 21st century as India transforms, so does its rural life. This book revisits the realities of contemporary rural India, exploring the trajectories of change across regions such as those in rural economies, the relationship of villages to the outside world, and the dynamics of caste inequalities. The volume puts together 14 papers based on empirical studies carried out by sociologists, social anthropologists, and economists over the past 15 years to begin a holistic conversation on contemporary rural India which continues to be an important site of social, political, and economic activities. *India's Villages in the 21st Century* stresses diversity as a fundamental structure of Indian economy and society and illustrates the point by focusing on the economies, patterns of settlements, and organization of social and political life in India's villages.

Inclusive Growth And Development In India
Challenges For Underdeveloped Regions And The
Underclass Ide Jetro Series

Development Challenges of India After Twenty Five Years of Economic Reforms

This book revisits some of the persisting challenges of development of India, which remain unresolved even after twenty-five years of economic reforms and almost fifteen years of high growth rate. These include defining purpose of development, inequality, labour, work, unemployment, agrarian distress and migration. The book questions the overemphasis on growth to the extent of neglecting basic issues of development. With a number of contributions re-imagining development and its political economy, the book discusses above mentioned issues in light of new data and more recent conceptions of the issues. The contributors of this volume are eminent researchers in their respective field. Presenting primary as well as secondary data, the book considers the latest advances and research and also addresses new challenges like the global reorganization of production and the consequences for labour and the world of work, along with skills question. World of work has received detailed investigation in this book. This is a timely addition in existing literature especially in context of pandemic and lockdown. Informality and un/employment question is addressed in this context. Relationship among poverty, inequality and growth is examined in light of newer understanding. Agrarian distress is looked Inclusive Growth And Development In India Challenges For Underdeveloped Regions And The Underclass Ide Jetro Series

in a broader context. A number of papers are examining migration question by expanding coverage of migration and including labour mobility as apart of migration debate. The present crisis of migrant labour and absence of social security for these workers is also discussed. This book is primarily intended for those interested in recent advances on some of the basic aspects of development, like poverty, inequality, informality, word of work, migration and labour mobility. It is also useful for researchers, policy makers, journalists and civil society organizations working on these issues.

Growth, Inequality and Social Development in India

With six essays exploring different aspects of economic growth, poverty, inequality and social security, this book offers a critical perspective on India's development experience since independence. Incisive and empirically rich, the book opens up new vistas in development discourse and informs current policy debates.

Making Economic Corridors Work for the Agricultural Sector

This book sheds new light on the advancement of various industries in developing Asian countries through an application and re-examination of catch-up industrialization theory. With contributors presenting their own perspectives on the progression of a range of different industries in Asia, this volume provokes readers to reconsider their current understanding of industrialization in latecomer countries. More specifically, the chapters discuss Taiwan's semiconductor industry, Korea's steel industry, and Malaysia's palm oil industry, amongst others. The authors also explore the 'catch-down' innovation strategy in China and India. Varieties and Alternatives of Catching-up provides a thorough analysis of the strategies employed by numerous Asian countries to radically transform their low-income agricultural economies to middle-income industrialized ones. This book is essential reading for researchers and scholars interested in Asian economic development.

Varieties and Alternatives of Catching- up

~~This book proposes a new, pragmatic way of~~
~~approaching economic development which features~~

~~Underclass Ide Jetro Series~~

policy learning based on a comparison of international best policy practices. While the important role of government in promoting private sector development is being recognized, policy discussion often remains general without details as to what exactly to do and how to avoid common pitfalls. This book fills the gap by showing concrete policy contents, procedures, and organizations adopted in high-performing East Asian economies. Natural resources and foreign aid and investment can take a country to a certain income level, but growth stalls when given advantages are exhausted. Economies will be caught in middle income traps if growth impetus is not internally generated. Meanwhile, countries that have soared to high income introduced mindset, policies, and institutions that encouraged, or even forced, accumulation of human capital – skills, technology, and knowledge. How this can be done systematically is the main topic of policy learning. However, government should not randomly adopt what Singapore or Taiwan did in the past. A continued march to prosperity is possible only when policy makers acquire capability to formulate policy suitable for local context after studying a number of international experiences. Developing countries wanting to adopt effective industrial strategies but not knowing where to start will benefit greatly by the ideas and hands-on examples presented by the author. Students of development

Inclusive Growth And Development In India
Challenges For Underdeveloped Regions And The
Underclass Ide Jetro Series

economics will find a new methodological perspective which can supplement the ongoing industrial policy debate. The book also gives an excellent account of national pride and pragmatism exhibited by officials in East Asia who produced remarkable economic growth, as well as serious effort by an African country to emulate this miracle.

Learning to Industrialize

This book is open access under a CC BY-NC-ND license. This volume analyzes the economic, social, and political challenges that emerging states confront today. Notwithstanding the growing importance of the 'emerging states' in global affairs and governance, many problems requiring immediate solutions have emerged at home largely as a consequence of the rapid economic development and associated sociopolitical changes. The middle-income trap is a major economic challenge faced by emerging states. This volume regards interest coordination for technological upgrading as crucial to avoid the trap and examines how various emerging states are grappling with this challenge by fostering public-private cooperation, voluntary associations of market players, and/or social networks. Social disparity is another serious problem. It is deeply rooted in
history in the emerging states such as South Africa
Inclusive Growth And Development In India
Challenges For Underdeveloped Regions And The
Underclass Ide Jetro Series

and many Latin American countries. However, income distribution is recently deteriorating even in East Asia that was once praised for its high economic growth with equity. Increasing pressure for political opening is another challenge for emerging states. This volume argues that the economic, social, and political problems are interwoven in the sense that the emerging states need to build political consensus in order to tackle the economic and social difficulties. Democratic institutions have not always been successful in this respect.

Emerging States at Crossroads

These conference proceedings provide data on the scale and characteristics of flows and stocks of skilled and highly skilled foreign workers, assess the quality of the data available and the concepts used, and discuss how to improve their comparability.

International Mobility of the Highly Skilled

The National Society for the Study of Education is ~~an organization of education scholars, professional~~
~~Inclusive Growth And Development In India~~
educators, and policymakers dedicated to the
Challenges For Underdeveloped Regions And The
Underclass Ide Jetro Series

improvement of education research, policy, and practice. Founded in 1901 by a small group of distinguished educators including John Dewey, Nicholas Murray Butler, and Charles Hubbard Judd, NSSE is the oldest national educational research organization in the United States. The mission of the National Society for the Study of Education is to investigate enduring and contemporary problems, disseminate the findings of its investigations, and engage members of the education community in study and discourse around those findings for the improvement of research, policy, and practice. One important way the Society accomplishes this mission is through the publication of its two-volume yearbooks, now in their 108th year. Each volume of a yearbook deals with a separate topic of current concern to educators. With knowledgeable scholars and practitioners as contributing authors, the yearbooks are reliable and authoritative sources of information on timely educational topics. Some yearbooks have become landmark publications in the field with which they deal.

Manga

Now a major motion picture nominated for nine Academy Awards. Narrative of Solomon Northup, a Citizen of New-York, Kidnapped in Washington City in 1841, and Rescued in 1853. Twelve Years a Slave by Solomon Northup is a memoir of a black man who was born free in New York state but kidnapped, sold into slavery and kept in bondage for 12 years in Louisiana before the American Civil War. He provided details of slave markets in Washington, DC, as well as describing at length cotton cultivation on major plantations in Louisiana.

Twelve Years a Slave

Human trafficking and smuggling of migrants: Four of the 12 illicit flows reviewed in this report involve human beings. The first two concern movement between the countries of the region, one for general labour and one for sexual exploitation. The third concerns the smuggling of migrants from the region to the rich countries of the West, and the last focuses on migrants smuggled through the region from the poor and conflicted countries of
South and South Asia Development and Trafficking: The Challenges For Underdeveloped Regions And The Underclass Ide Jetro Series

production and use of opiates has a long history in the region, but the main opiate problem in the 21st century involves the more refined form of the drug: heroin. In addition, methamphetamine has been a threat in parts of East Asia for decades (in the form of yaba tablets), but crystal methamphetamine has recently grown greatly in popularity. Virtually every country in the region has some crystal methamphetamine users, and some populations consume at very high levels. Resources: Resource-related crimes include those related to both extractive industries, such as the illegal harvesting of wildlife and timber, and other crimes that have a negative impact on the environment, such as the dumping of e-waste and the trade in ozone-depleting substances. In all cases, the threat goes beyond borders, jeopardizing the global environmental heritage. These are therefore crimes of inherent international significance, though they are frequently dealt with lightly under local legislation. Counterfeit goods: The trade in counterfeit goods is often perceived as a \"soft\" form of crime, but can have dangerous consequences for public health and safety. Fraudulent medicines in particular pose a threat to public health, and their use can foster the growth of treatment resistant pathogens.

Transnational Organized Crime in East Asia and the Pacific

The adoption by WHO's Member States of the Global Code of Practice in the International Recruitment of Health Personnel, and the implementation of it by so many countries, represent two of the biggest steps in recent years towards solving the shortage of health-care workers around the world. The countries' response has been a momentous achievement. Now, a third big step is being taken with the publication of this book. It underlines WHO's unwavering commitment to supporting the implementation of the Code and provides a wide range of detailed examples from the countries themselves of how they are tackling the many complex issues involved. It provides not just numerous insights into progress but also gives other countries valuable guidance and recommendations on how they, too, can implement the Code. Countries are encouraged to learn from the shared experiences, domestic solutions and multi-lateral cooperation described in this book, and move ahead to support and advance the Code's aspirational principles. By doing so, they also strengthen the campaign towards Universal Health Care -- a campaign that requires innovative solutions to the health workforce shortage in order to be successful. The crux of the Code is the

Inclusive Growth And Development In India Challenges For Underdeveloped Regions And The Underclass Ide Jetro Series

through all aspects of education, improved retention and fair recruitment practices while encouraging technical collaboration and financial support. WHO is playing a leading role in these initiatives and stands ready to assist all its Member States in implementing the Code. We strongly recommend this book to health policy-makers and decision-takers in governments, nongovernmental organizations and other partners and stakeholders, including civil society. They will find it an indispensable guide to a better future for health-care personnel and the people they serve.

Migration of Health Workers

Contested Governance in Japan extends the analysis of governance in contemporary Japan by exploring both the sites and issues of governance above and below the state as well as within it. All contributors share a common perspective on governance as taking place in different sites of activity, and as involving a range of issues related to the norms and rules for the management, coordination and regulation of order, whether within Japan or on the regional or global levels. This volume discusses the contested nature of governance in Japan and the ways in which a range of actors are involved in different sites and issues of governance within and across the region and the globe.

Inclusive Growth And Development In India Challenges For Underdeveloped Regions And The Underclass Ide Jetro Series

Inclusive Growth And Development In India Challenges For Underdeveloped Regions And The Underclass Ide Jetro Series

Including chapters on global governance, local policy-making, democracy, environmental governance, the Japanese financial system, corruption, the family and corporate governance, this collection will be of interest to anyone studying Japanese politics and governance.

Contested Governance in Japan

Co-produced by the Asian Development Bank, the Japan Bank for International Co-operation and the World Bank, this publication examines the challenges of infrastructure development facing the countries of East Asia, driven by their rapid economic growth and urbanisation. The report is organised around three main themes: inclusive development; co-ordination of infrastructure levels; accountability and risk management; and includes case studies of regional good practice.

Connecting East Asia

This volume offers fresh insights into economic development and growth in emerging economies. It includes contributions covering topics such as natural disasters and income inequalities, the environmental impact of economic growth, social
inclusive growth and development in India
Inclusive Growth And Development In India Challenges For Underdeveloped Regions And The Underclass Ide Jetro Series

under democracy, inflation targeting and its covariates, economic empowerment. This book is intended for scholars in the field of economics, and those interested in furthering economic development.

Critical Perspectives on Emerging Economies

This publication analyzes recent developments in migration movements and policies in OECD countries and some non-member economies, as well as the evolution of recent labor-market outcomes of immigrants in OECD countries. The series comprises country studies of labor migration policies. Each volume analyzes whether a country is effectively and efficiently using migration policy to help meet its labor needs, without adverse effects on national labor markets.

International Migration Outlook 2015

This book examines the question of class formation and social inequality within tribal groups in North-East India. Focussing on the Nagas, it analyses and challenges common perceptions about them as a ~~class-less society with a uniform culture. It looks at~~
~~Inclusive Growth And Development In India~~
the previously neglected themes of class formation
Challenges For Underdeveloped Regions And The
Underclass Ide Jetro Series

and structure, division of work, emerging social milieus and cultural differentiation among the Naga youth – and presents fresh arguments about notions of modernity. Providing a theoretical understanding of inequality, this volume will be useful for scholars and researchers of North-East India, tribal studies, exclusion studies, sociology, social anthropology, political studies, development studies, cultural studies and South Asian studies.

Class Formation, Social Inequality and the Nagas in North-East India

Why do poor countries give aid to others? This book critically examines how aspirations for providing aid have coexisted with experiences of receiving aid and have transformed the practice of giving aid, with particular reference to the experiences of Japan and China. It highlights the historical sources that explain the pattern and strength of foreign aid that these new donors provide. The book has systematically examined the situation unique to middle income countries that are receiving and giving aid simultaneously. It sheds light on the endogenous elements embedded in the socio-economic conditions of emerging donors, as well as their learning process as aid recipients. This book ~~examines not only the perspectives of recipients,~~
~~but also the growth of aid development in the case of China,~~
Inclusive Growth And Development In India Challenges For Underdeveloped Regions And The Underclass Ide Jetro Series

and the USA and the World Bank in the case of Japan. By bringing in the donor's perspective, we come to a holistic understanding of foreign aid as a product of interaction between the various agents involved. The book provides not only an in-depth case study of Japan from a historical perspective, but also stretches its scope to cover contemporary debates on "emerging donors," including China, India and Korea who have received substantial amount of aid from Japan in the past. This book connects the often separated discussion of Japanese aid and the way it developed in relation to outside forces. In short, this book represents the first attempt to empirically examine the "life of a donor" with a clear focus on the origins, struggles, and futures of non-western donors and their impact on established aid regime.

The Rise of Asian Donors

In a world where no country is an island isolated from others, globalization is bound to be contested, debated, and de- and re-constructed at different levels across the international community. This book collects articles authored by Chinese scholars on the subject of globalization and localization.

The Spirit of Chinese Capitalism

Despite clear aspirations by the Association of Southeast Asian Nations (ASEAN) to create an effective and transparent framework to facilitate movements among skilled professionals within the ASEAN by December 2015, progress has been slow and uneven. This report examines the challenges ASEAN member states face in achieving the goal of greater mobility for the highly skilled, including hurdles in recognizing professional qualifications, opening up access to certain jobs, and a limited willingness by professionals to move due to perceived cultural, language, and socioeconomic differences. The cost of these barriers is staggering and could reduce the region's competitiveness in the global market. This report launches a multiyear effort by ADB and the Migration Policy Institute to better understand the issues and develop strategies to gradually overcome the problems. It offers a range of policy recommendations that have been discussed among experts in a high-level expert meeting, taking into account best practices locally and across the region.

Globalization and Localization

Since 1979 the World Economic Forum, a foundation based in Geneva, has produced annual

Inclusive Growth And Development In India
Challenges For Underdeveloped Regions And The
Underclass Ide Jetro Series

reports on the relative competitiveness of countries (the term "country" as used in this report covers well-defined, geographically self-contained areas that are not states but for which statistical data are maintained on a separate and independent basis), tracing the extraordinary development of the world economy during the last twenty years. The Global Competitiveness Report uses a research-based Competitiveness Index in which rankings of relevant economies are given on a multitude of business and economic factors. From its inception, the Report has furnished specific competitive information on the world's key economies (59 this year), now presented with two page profiles for each economy. These profiles provide: major performance indicators; each economy's rank in competitiveness; and highlights of particular strengths and weaknesses. Each year the Report becomes an ever more refined analytical tool for exploring the exponential expansion of interconnections in our global economy.

Memlinc

Health and medicine cannot be understood without considering the role of nurses, both as professionals and as working women. In India, unlike other countries, nurses have suffered an exceptional degree of neglect at the hands of state, Inclusive Growth And Development In India Challenges For Underdeveloped Regions And The Underclass Ide Jetro Series

a situation that has been detrimental to the quality of both rural and urban health care. Charting the history of the development of nursing in India over 100 years, Indian Sisters examines the reasons why nurses have so consistently been sidelined and excluded from health care governance and policymaking. The book challenges the routine suggestion that nursing's poor status is mainly attributable to socio-cultural factors, such as caste, limitations on female mobility and social taboos. It argues instead that many of its problems are due to an under-achieved relationship between a patriarchal state on the one hand, and weak professional nursing organisations shaped by their colonial roots on the other. It also explores how the recent phenomenon of large-scale emigration of nurses to the West (leading to better pay, working conditions and career prospects) has transformed the profession, lifting its status dramatically. At the same time, it raises questions about the implications of emigration for the fate of health care system in India. An important contribution to the growing academic genre of nursing history, the book is essential reading for scholars and students of health care, the history of medicine, gender and women's studies, sociology, and migration studies. It will also be useful to policymakers and health professionals.

Achieving Skill Mobility in the ASEAN Economic Community

With special reference to developing countries.

Transition and Development

La 4e de couv.indique : \"This is the seventh volume in the long-running Marketing Scales Handbook series. The purpose of the book is to help readers benefit from vetted research by some of the world's consumer behavior experts. By learning about the measures used by the experts, the hope is that those who borrow the well-developed scales rather than using \"quick-and-dirty\" measures will achieve higher quality insights in their research activities. The book contains reviews of 364 multi-item measures that were reported in one or more articles published in top marketing journals in 2010 and 2011. Each review provides the scale items (questions or statements) as well as information about the scale's origin, previous users, and measurement quality. The scales are useful when wanting to accurately measure theoretical constructs such as attitudes, emotions, and traits in surveys and experiments with a wide variety of participants such as consumers, viewers, patients, patrons, or citizens. Many of the measures could
