Project Mercury

Wayback Machine The Astronauts: United States Project Mercury is available for free viewing and download at the Internet Archive Portal: Spaceflight

Project Mercury was the first human spaceflight program of the United States, running from 1958 through 1963. An early highlight of the Space Race, its goal was to put a man into Earth orbit and return him safely, ideally before the Soviet Union. Taken over from the U.S. Air Force by the newly created civilian space agency NASA, it conducted 20 uncrewed developmental flights (some using animals), and six successful flights by astronauts. The program, which took its name from Roman mythology, cost \$2.76 billion (adjusted for inflation). The astronauts were collectively known as the "Mercury Seven", and each spacecraft was given a name ending with a "7" by its pilot.

The Space Race began with the 1957 launch of the Soviet satellite Sputnik 1. This came as a shock to the American public, and led...

Hybrid electric vehicle

Teknisk Ukeblad. 2017-05-08. Retrieved 2017-05-09. "ebicycle Mariner Systems | Electric

Outboards|Hybrid/Electric Propulsion|Marine APU's". Ecyclemarine.com

A hybrid electric vehicle (HEV) is a type of hybrid vehicle that couples a conventional internal combustion engine (ICE) with one or more electric engines into a combined propulsion system. The presence of the electric powertrain, which has inherently better energy conversion efficiency, is intended to achieve either better fuel economy or better acceleration performance than a conventional vehicle. There is a variety of HEV types and the degree to which each functions as an electric vehicle (EV) also varies. The most common form of HEV is hybrid electric passenger cars, although hybrid electric trucks (pickups, tow trucks and tractors), buses, motorboats, and aircraft also exist.

Modern HEVs use energy recovery technologies such as motor-generator units and regenerative braking to recycle...

Apollo 13

film Apollo 13: "Houston, We've Got A Problem" is available for free viewing and download at the Internet Archive. Portals: Astronomy Stars Spaceflight

Apollo 13 (April 11–17, 1970) was the seventh crewed mission in the Apollo space program and would have been the third Moon landing. The craft was launched from Kennedy Space Center on April 11, 1970, but the landing was aborted after an oxygen tank in the service module (SM) exploded two days into the mission, disabling its electrical and life-support system. The crew, supported by backup systems on the Apollo Lunar Module, instead looped around the Moon in a circumlunar trajectory and returned safely to Earth on April 17. The mission was commanded by Jim Lovell, with Jack Swigert as command module (CM) pilot and Fred Haise as Lunar Module (LM) pilot. Swigert was a late

replacement for Ken Mattingly, who was grounded after exposure to rubella.

A routine stir of an oxygen tank ignited damaged...

Wikipedia:Language learning centre/Word list

Drawing up a comprehensive list of words in English is important as a reference when learning a language as it will show the equivalent words you need to learn in the other language to achieve fluency. A big list will constantly show you what words you don't know and what you need to work on and is useful for testing yourself. Eventually these words will all be translated into big lists in many different languages and using the words in phrase contexts as a resource. You can use the list to generate your own lists in whatever language you're learning and to test yourself.

Dementia with Lewy bodies[edit]

Nominator(s): SandyGeorgia and Colin°

Who did not love Robin Williams? So, if you think you know what condition Robin Williams had when he died, there will be a quiz at the end of this article, where you will learn more new terms than you ever wanted to know. Dementia with Lewy bodies (DLB) has been a two-year collaboration involving medical editors working with FAC's own art cabal. Research and factoids chunked in by me; copyediti...
