Practical Guide to SAP Business Partner Functions and Integration with SAP S/4HANA

With the conversion from SAP ERP to SAP S/4HANA, the concept of classic customers and vendors is a thing of the past. SAP Business Partner is now the leading object for processing master data information for customers and vendors. Transactions such as FD01/FK01, FD02/FK02 and XK01/XK02 are automatically redirected to the leading transaction BP. In this practical guide, learn step by step how to work with SAP Business Partner, including primary customization settings, and the creation of an SAP business partner with single and grouped roles. Specialized topics such as search help, field attributes, and authorizations are also covered. A comparison of greenfield and brownfield approaches is an essential aspect of this book. For readers who want, or need, to migrate their current data, guidance is provided on business partner conversion types. This guide pays special attention to master data synchronization via the CVI Cockpit, including the assignment of number ranges and intervals. - The SAP Business Partner concept - SAP Business Partner integration in SAP ERP and SAP S/4HANA - SAP Business Partner synchronization and Customer-Vendor Integration (CVI) - Overview of customization settings and master data maintenance

Praxishandbuch SAP CVI (Customer-Vendor-Integration)

Obwohl die Customer-Vendor-Integration (CVI) im Hintergrund arbeitet und vom Anwender eher unbemerkt bleibt, gewinnt sie, im Zusammenspiel mit dem SAP-Geschäftspartner und der aktuell in vielen Unternehmen anstehenden Umstellung von SAP ERP auf SAP S/4HANA, erheblich an Bedeutung. Hier übernimmt sie die wesentliche Funktion die Konvertierung bzw. die Synchronisation der Objekte Geschäftspartner, Debitor und Kreditor sicherzustellen. In diesem praktischen Leitfaden werden

Ihnen die Funktionen sowie das Customizing der CVI im Zusammenspiel mit dem SAP-Geschäftspartner auf anschauliche Weise dargelegt. Der Autor demonstriert dies anhand der beiden grundsätzlichen Szenarien zur Umstellung auf SAP S/4HANA On-Premise: der Neueinrichtung (Greenfield) sowie der Konvertierung (Brownfield). Dabei betrachtet er die Customer-Vendor-Integration im Kontext von SAP ERP wie auch von SAP S/4HANA. Sie erhalten zudem umfangreiche Hinweise zu den wesentlichen Reports, Berechtigungsobjekten, Transaktionen, Tabellen und SAP-Hilfen im CVI-Umfeld. Auch wird detailliert auf das Synchronisations- und das neue CVI Cockpit sowie die Adressfindung eingegangen. - Funktionen, Einrichtung und Arbeitsweise der CVI - Kunden-/Lieferantenintegration in den zentralen Geschäftspartner - Vergleich der Prozesse beim Brownfield- und Greenfield-Ansatz - Arbeiten mit dem Synchronisations- und dem CVI Cockpit

Logistics with SAP S/4HANA

Imagine you are a business user, consultant, or developer about to enter an SAP S/4HANA implementation project. You are well-versed with SAP's product portfolio and you know that the preferred reporting option in S/4HANA is embedded analytics. But what exactly is embedded analytics? And how can it be implemented? And who can do it: a business user, a functional consultant specialized in financial or logistics processes? Or does a business intelligence expert or a programmer need to be involved? Good questions! This book will answer these questions, one by one. It will also take you on the same journey that the implementation team needs to follow for every reporting requirement that pops up: start with assessing a more standard option and only move on to a less standard option if the requirement cannot be fulfilled. In consecutive chapters, analytical apps delivered by SAP, apps created using Smart Business Services, and Analytical Queries developed either using tiles or in a development environment are explained in detail with practical examples. The book also explains which option is preferred in which situation. The book covers topics such as in-memory computing, cloud, UX, OData, agile development, and more. Author Freek Keijzer writes from the perspective of an implementation consultant, focusing on functionality that has proven itself useful in the field. Practical examples are abundant, ranging from "codeless" to "hardcore coding." What You Will Learn Know the difference between static reporting and interactive querying on real-time data Understand which options are available for analytics in SAP S/4HANA Understand which option to choose in which situation Know how to implement these options Who This Book is For SAP power users, functional consultants, developers

The use of bibliometrics for the analysis of technology management is on the rise in our increasingly technological societies.

Many are using these tools to document or record the rise of various technologies, making it necessary to take stock of the value and application of scientometric methods and their measures. Innovation Discovery shows the current state of play within the field of management of technology, and discusses how we can use networks to explore, understand and generate theory around the innovation process. It looks at the different streams of analysis used to understand bibliometric data, and presents alternative and novel ways of applying these techniques. Written as a comprehensive review of approaches by leading researchers in the field, this book is suitable for graduate and post-graduate students and researches looking to expand their knowledge and embark on further investigations in technology management. Contents: Part 1: Bibliometrics: The Case of Comparing an Ecosystem Using System and Network Approaches (Marco Tregua, Anna D'Auria, Tiziana Russo Spena, and Francesco Bifulco) Bibliometrics and Patents: Case of Forecasting of Biosensor Technologies for Emerging Point-of-Care and Medical IoT Applications (Nasir Jamil Sheikh, and Omar Sheikh) Patents: The Case of Exploitation of the Patent System Among SMEs and Private Inventors in Finland (J Talvela, M Karvonen, and T Kässi) Patents: Case of Analyzing Technological Knowledge Diffusion Among Technological Fields Using Patent Data: The Example of Microfluidics (Zheng Qiao, Lu-Cheng Huang, Fei-Fei Wu, Dan Wu, and Hui Zhang) Part 2: Patents and Networks: Case of Discerning the Evolutionary Nature of Technological Change in the Complex Product Industry (Fei Yuan and Kumiko Miyazaki) Patents and Networks: Case of Identification of Core Industry Actors for Electric Vehicle Battery by Application of Knowledge Flow (Yuan Yuan Shi and Tugrul Daim) Patents and Networks: Case of Social Network Analysis for Innovation (Antonello Cammarano, Mauro Caputo, Emilia Lamberti, and Francesca Michelino) Patents and Networks: Case of Cochlear Implant Technology Evolution Using Patent Classification Data (Srigowtham Arunagiri and Mary Mathew) Part 3: Bibliometrics and Networks: Case of a Multinational Perspective on How Eco-Innovation has Evolved in Academic Literature (Blanca de-Miguel-Molina, María de-Miguel-Molina, María-del-Val Segarra-Oña, and Ángel Peiró-Signes) Bibliometrics and Social Network Analysis Supporting the Research Development of Emerging Areas: Case Studies from Thailand (Nathasit Gerd Sri and Alisa Kongthong) Bibliometrics and Networks: Trends and Typology of Emerging Antenna Propagation Technologies (Yasutomo Takano, Yuya Kajikawa, and Makoto Ando) Bibliometrics and Networks: Case of Project Management and the Emergence of a Knowledge-Based Discipline (Alan Pilkington, Kah-Hin Chai, and Le Yang) Part 4: Emerging Networking Methods: Innovation Intermediaries in Technological Alliances (Calvin S Weng) Emerging Networking Methods: Analysing Funding Patterns and Their Evolution in Two Medical Research Topics (Blanca de-Miguel-Molina, Scott W Cunningham, and Fernando Palop) Part 5: Advanced Methods: Identifying the Technology Profiles of R&D Performing Firms — A Matching of R&D and Patent Data (Peter Neuhäusler, Rainer Frietsch, Carolin Mund, and Verena Eckl) Advanced Methods: Identification of Promising High-Tech Solutions with Semantic Technologies: Energy, Pha

"Learn how to implement demand driven metrics for vast improvement in measuring performance. Demand Driven Performance details why the outdated forms of measurement are inappropriate for current circumstances and reveals an elegant set of global and local metrics to fit today's demand driven world. The book shows how to minimize the organizational and supply chain conflicts that impede flow, and eventually, corporate success. Metrics are used to create a benchmark for measuring improvement and to identify and focus on those improvements that are most needed, and that have the highest ROI. However, the world has fundamentally changed in terms of delivering value and driving strong financial performance and growth. The continued use of outdated metrics is driving companies in the wrong direction giving them false signals, putting their personnel into conflict at all levels of the organization, and also wreaking havoc in the supply chain. This book offers solutions to remedy these issues. Defines a new demand driven approach for measuring total organizational performance and the corresponding local metrics that integrate with those measures Advocates a systems approach to measuring improvement, and shows how conventional metrics are no longer appropriate Focuses on reliability, stability, speed/velocity, strategic contribution, local operating expense, and local improvement waste A case study demonstrates the processes in the book and provides you with

the technology and tools needed to achieve a demand driven system \"--

Let's Design On-Demand Business Model _DESCRIPTION Service-Oriented Architecture (SOA) is an architectural approach that can be shared and reused. The book proposes a service-based architecture approach to design an adaptive business model for small enterprises. It presents an ad-hoc model which is based on five layered SOA architecture that can integrate all activities comprising Supply Chain Management (SCM), Customer Relationship Management (CRM), Technical and Enterprise applications tools, and hence, it best suits the SME requirements. This book covers the challenges that SMEs face to compete with large enterprises. It also compares the proposed model with traditional ERP systems and other similar approaches. It is found that the SOA model is efficient, cost-effective, and competent with similar existing solutions. There is always a need to know the scope and size of the work involved while developing a service or deriving any application from service-based model; this book will help in determining the cost and effort for such projects. KEY FEATURES - Guide to investigate series of processes/activities (value chain activities) required in Small and Medium size Enterprises (SME). - Guide for organizations to identify which SOA infrastructure will be needed to build service-based applications for themselves. - Guide for organizations to test the SOA model in order to meet the changing on-demand business requirements and ensure high level of security and governance. - Guide to handle interoperability between different vendor infrastructures. WHAT WILL YOU LEARN The book will cover the detailed study of service-oriented model from the inception of the idea to its final implementation. You will be able to understand the basic components of service-oriented architecture. You will learn how to develop SOA based model and will realize that most of the interoperability problems visible at the conceptual level could be overcome. The successful simulation of integration among business value chain activities by using the service-oriented methodology can be served as guidelines for researchers, system designers, and system stakeholders to obtain integrated and accurate output information. WHO THIS BOOK IS FOR Anyone who is interested to gain knowledge about the architecture of service-based model and would like to pursue research in this domain. • TABLE OF CONTENTS 1. Service-Oriented Architecture Ð an Introduction 2. Review of

There has been much debate about the auditor's role in fraud detection. Since auditors lack sufficient skill and experience to have a reasonable chance of detecting fraud, it is argued they should look to other disciplines for useful knowledge. This book draws on criminology, psychology and sociology to put forward a model of fraud aetiology which was tested in a study of major fraud offenders. Attention then focuses on a survey of auditor's experience in detecting material irregularities in the financial statements which tested the usefulness of an eclectic fraud detection model that includes the fraud aetiology model as one of its components.

Kaplan, Harvard Business School; coauthor of The Balanced Scorecard: Translating Strategy into Action, The Execution Premium, and many other books \"Gary Cokins demonstrates in this book that performance management is not a mysterious black art, but a structured, process-oriented discipline. If you want your performance management system to be a smoothly running analytical machine, read and apply the ideas in this book—it's all you need.\" —Thomas H. Davenport, President's Distinguished Professor of Information Technology and Management, Babson College; coauthor of Competing on Analytics: The New Science of Winning \"Drawing on a deep reservoir of knowledge and experience gained from hundreds of customer engagements around the world, Gary Cokins offers an authoritative examination of the major dimensions of performance management. Cokins not only paints a rich and textured view of the major principles and concepts driving performance management implementations, he offers a nuanced look at the important subtleties that can spell the difference between success and failure. This is an informative and enjoyable text to read!\" —Wayne Eckerson, Director of Research, The Data Warehouse Institute (TDWI); author of Performance Dashboards: Measuring, Monitoring, and Managing Your Business \"[In this] very insightful book, the view of an integrated performance management framework with a goal to link various operational activities with business strategy is an excellent approach to manage and improve business. Gary's explanation of risk-based performance management, for providing the capability to achieve long-term objectives with reliably calculated risks, is definitely thought provoking.\" —Srini Pallia, Global Head and Vice President of Business Technology Services, Wipro Technologies, Bangalore, India \"Gary Cokins is clearly one of the world's thought leaders in the area of performance management, and the need for integrated performance management, improvement and execution is clearly at a premium in these challenging economic times. This book is a must read for CEOs, CFOs, and management accountants around the globe seeking higher levels of sustainable business performance for their stakeholders.\" —Jeffrey C. Thomson, President and CEO, Institute of Management Accountants

ABAP Development for SAP Business Workflow

Solid State Drives (SSDs) are gaining momentum in enterprise and client applications, replacing Hard Disk Drives (HDDs) by

offering higher performance and lower power. In the enterprise, developers of data center server and storage systems have seen CPU performance growing exponentially for the past two decades, while HDD performance has improved linearly for the same period. Additionally, multi-core CPU designs and virtualization have increased randomness of storage I/Os. These trends have shifted performance bottlenecks to enterprise storage systems. Business critical applications such as online transaction processing, financial data processing and database mining are increasingly limited by storage performance. In client applications, small mobile platforms are leaving little room for batteries while demanding long life out of them. Therefore, reducing both idle and active power consumption has become critical. Additionally, client storage systems are in need of significant performance improvement as well as supporting small robust form factors. Ultimately, client systems are optimizing for best performance/power ratio as well as performance/cost ratio. SSDs promise to address both enterprise and client storage requirements by drastically improving performance while at the same time reducing power. Inside Solid State Drives walks the reader through all the main topics related to SSDs: from NAND Flash to memory controller (hardware and software), from I/O interfaces (PCIe/SAS/SATA) to reliability, from error correction codes (BCH and LDPC) to encryption, from Flash signal processing to hybrid storage. We hope you enjoy this tour inside Solid State Drives.

Performance Management

From its humble beginnings in Germany, SAP skyrocketed to become a global powerhouse and the technology backbone for tens of thousands of enterprises. The economy around it grew even faster, and "SAP Nation" now approaches the GDP of Ireland in size. This book documents both trajectories, based on decades of research and interviews of hundreds of customers, market analysts and competitors. SAP's influence has declined in the last decade, as enterprises invest in cloud, social, analytical and mobile technologies and in custom development of "systems of advantage" in their products, channels and business models. Yet, shockingly, customer spending in SAP Nation remains stubbornly high. The model in the book estimates post-recession investment at more than one trillion dollars (yes). This book brings out loudly the voice of SAP customers as they cope with this runaway economy. Twenty-five case studies showcase a spectrum of strategies - some are "ring fencing" SAP with Workday, others are switching maintenance to Rimini Street, yet others are in-sourcing, while still others are evaluating newer SAP products like HANA and acquisitions like Concur. Part root cause analysis and part strategy manual, this book is a must-read for anyone with interest in SAP - as customer, employee, partner, investor or competitor. It is a fast-paced look at decades of what SAP has done well, and what it could have done better. Executives everywhere, even those in non-SAP settings, will benefit from

the strategies described in the book to migrate inefficient back-office IT dollars to front-office innovation.

Inside Solid State Drives (SSDs)

These are the proceedings of the International Conference on Manufacturing Engineering and Processing (ICMEP 2012), held on the 21st and 22nd April, 2012, in Kunming, China. The objective of ICMEP 2012 was to provide a forum for the discussion of new developments, recent progress and innovations in Manufacturing Engineering and Processing. These proceedings address all aspects of design methods, with the emphasis placed on current and future challenges in research and developments in academia and industry.
