The anthrax attacks in September and October 2001 highlighted the need to develop medical countermeasures. The Project BioShield Act of 2004 authorized the Department of Health and Human Services (HHS) to procure countermeasures for a Strategic National Stockpile. However, in December 2006, HHS terminated the contract for a recombinant protective antigen (rPA) anthrax vaccine because VaxGen failed to meet a critical contractual milestone. Also, supplies of the licensed BioThrax anthrax vaccine already in the stockpile will start expiring in 2008. GAO was asked to identify (1) factors contributing to the failure of the rPA vaccine contract and (2) issues associated with using the BioThrax in the stockpile. GAO interviewed agency and industry officials, reviewed documents, and consulted with biodefense experts.

Speaking all over the United States about apologetics issues, Charlie Campbell has heard just about every question skeptics have to offer. In this concise, reader-friendly handbook, he provides brief responses to the top-40 questions that keep people from the faith, such as... What evidence do you have that God exists? How do you know the Bible is actually true? What about those who have never heard of Jesus? Will they be condemned to hell? If God is so loving, why does He allow evil and suffering? How can you say Jesus is the only way to heaven? Don't all religions basically teach the same thing? Aren't a lot of churchgoers hypocrites? With a gracious introductory note to skeptical readers and a generous sprinkling of inspiring quotes throughout, this handy resource is an enjoyable read as well as a powerful evangelistic tool.

One-Minute Answers to Skeptics

Established in 1958 in response to Russia's Sputnik 1, launched on 4 October as the world's first artificial satellite, NASA - the National Aeronautics and Space Administration - emerged out of the National Advisory Committee for Aeronautics which had been formed in 1915. The NASA Operations Manual tells the story of America's civilian space agency, the facilities it operates, where they are and what they do. It explains how much NASA costs the American taxpayer and looks at what it returns to the taxpayer in benefits to the economy. NASA has forged a niche in modern history that extends beyond the realisation of age-old dreams to leave Earth and explore the heavens - it has become a synonym for achievement, performance and greatness, in setting goals and achieving them, in failing and

learning how to recover, in connecting people around the world with international programmes to explore our solar system and live our ambitions, and in improving the lives of people everywhere through its inventions, discoveries, its technology and its engineering. Sixty years after NASA took hold of the reins of US civilian space programmes, the agency has a bold vision for great and ambitious goals, taking humans back to the Moon and on to Mars, perhaps visiting an asteroid, or setting up an interplanetary transport system on the way. And all the time, providing inspiration for a new generation. With more than 300 photographs, line drawings and charts, this book tours the United States, describing the centres of excellence and the facilities where rockets are tested, satellites are built and humans prepare for space. With summary review of research laboratories, test rigs, experimental platforms and engineering facilities, this book describes the 60 years of NASA as it has evolved through changing requirements and expanding capabilities, building on the past and preparing for a bold future.

A los doce años, Nicholas Goering sobrevivió milagrosamente a un disparo en la cabeza perpetrado por su propio padre, después de que este matara a su madre y se suicidara sin motivo aparente. Veinticinco años más tarde, ahora convertido en un referente de la Patología Forense en el prestigioso hospital de la ciudad sajona de Heimstadt, el misántropo doctor tendrá que lidiar con el caso más extraño de su carrera: el cuerpo de su padre ha aparecido en perfecto estado de conservación colgado como en el día de su muerte y le han colocado los órganos internos de distintas personas. El recientemente ascendido y temperamental detective Matías Vandergelb, quien desprecia al patólogo, y la ambiciosa psiquiatra Angélica Grunnwald, quien, por el contrario, está obsesionada con él, serán los encargados de intentar resolver el rompecabezas humano en una carrera contrarreloj. Memento Mori es la primera entrega de la trilogía.
