The BMW X5 is a mid-size luxury crossover SUV produced by BMW. The X5 made its debut in 1999 as the E53 model. It was BMW's first SUV. At launch, it featured all-wheel drive and was available with either a manual or automatic gearbox. The second generation was launched in 2006, and was known internally as the E70. The E70 featured the torque-split capable xDrive all-wheel drive system mated to an automatic gearbox. In 2009, the X5 M performance variant was released as a 2010 model.

BMW marketed the X5 officially as a "Sports Activity Vehicle" (SAV), rather than an SUV, to indicate its on-road handling capability despite its large dimensions. The X5 signaled a shift away from the utilisation of body-on-frame construction, in favour of more modern monocoque chassis construction. Although the...

The current Mini range includes the Cooper Hardtop/Hatch/Convertible (three and five-door hatchback), Aceman and Countryman (five-door crossovers). The word Mini has been used in car model names since 1959, and in 1969 it became a brand in its own right when the name "Mini" replaced the separate "Austin Mini" and "Morris Mini" car model names. BMW acquired the brand in 1994 when it bought Rover Group (formerly British Leyland), which owned Mini, among other brands.

The original Mini was a line of British...

They have four-wheel drive, and were developed in the 1980s from the Land Rover series which was launched at the Amsterdam Motor Show in April 1948. The Triumph Motor Company was a British car and motor manufacturing company in the 19th and 20th centuries. The marque had its origins in 1885 when Siegfried Bettmann of Nuremberg formed S. Bettmann & Co. and started importing bicycles from Europe and selling them under his own trade name in London. The trade name became "Triumph" the following year, and in 1887 Bettmann was joined by a partner, Moritz Schulte, also from Germany. In 1889, the businessmen started producing their own bicycles in Coventry, England.

Triumph manufactured its first car in 1923. The company was acquired by Leyland Motors in 1960, ultimately becoming part of the giant conglomerate British Leyland (BL) in 1968, where the Triumph brand was absorbed into BL's Specialist Division alongside former Leyland stablemates Rover...

Automatic parking is an autonomous car-maneuvering system that moves a vehicle from a traffic lane into a parking spot to perform parallel, perpendicular, or angle parking. The automatic parking system aims to enhance the comfort and safety of driving in constrained environments where much attention and experience is required to steer the car. The parking maneuver is achieved by means of coordinated control of the steering angle and speed which takes into account the actual situation in the environment to ensure collision-free motion within the available space.

Multiple car manufacturers have added limited versions of an Automated Valet Parking (AVP) system to their vehicles. The systems allow a car to park itself in certain parking lots or garages, without a driver in the vehicle.
