The National Environmental Policy Act (NEPA) is a United States environmental law designed to promote the enhancement of the environment. It created new laws requiring U.S. federal government agencies to evaluate the environmental impacts of their actions and decisions, and it established the President's Council on Environmental Quality (CEQ). The Act was passed by the U.S. Congress in December 1969 and signed into law by President Richard Nixon on January 1, 1970. More than 100 nations around the world have enacted national environmental policies modeled after NEPA.

NEPA requires federal agencies to evaluate the environmental effects of their actions. NEPA's most significant outcome was the requirement that all executive federal agencies prepare environmental assessments (EAs) and environmental...

Mekong

often termed "other aquatic animals" (OAAs) such as freshwater crabs, shrimp, snakes, turtles, and frogs. OAAs account for about 20% of the total Mekong

The Mekong or Mekong River (UK: mee-KONG, US: may-KAWNG) is a transboundary river in East Asia and Southeast Asia. It is the world's twelfth-longest river and the third-longest in Asia with an estimated length of 4,909 km (3,050 mi) and a drainage area of 795,000 km² (307,000 sq mi), discharging 475 km³ (114 cu mi) of water annually. From its headwaters in the Tibetan Plateau, the river runs through Southwest China (where it is officially called the Lancang River), Myanmar, Laos, Thailand, Cambodia, and southern Vietnam. The extreme seasonal variations in flow and the presence of rapids and waterfalls in the Mekong make navigation difficult, though the river remains a major trade route between Tibet and Southeast Asia. The construction of hydroelectric dams along the Mekong in the 2000s through...

Clean Power Plan

policy yet — the Clean Power Plan” . Vox. Retrieved August 3, 2015. EPA, OAR, OAA, US. "FACT SHEET: Clean Power Plan Benefits". www2.epa.gov. Archived from

The Clean Power Plan was an Obama administration policy aimed at combating climate change that was first proposed by the Environmental Protection Agency (EPA) in June 2014. The final version of the plan was unveiled by President Barack Obama on August 3, 2015. Each state was assigned a target for reducing carbon emissions within its borders, which could be accomplished how the states saw fit, but with the possibility of the EPA stepping in if a state refused to submit a plan. If every state met its target, the plan was projected to reduce carbon emissions from electricity generation by 32 percent relative to 2005 levels by 2030, and would have reduced other harmful air pollution as well.

In March 2017, President Donald Trump signed an executive order mandating that the EPA review the plan....

History of Indigenous Australians

Aboriginal Affairs was established by the Holt government in 1967. In 1972, the OAA was transformed into a separate government department by the Whitlam government

The history of Indigenous Australians began 50,000 to 65,000 years ago when humans first populated the Australian continent. This article covers the history of Aboriginal Australian and Torres Strait Islander peoples, two broadly defined groups which each include other sub-groups defined by language and culture. Human habitation of the Australian continent began with the migration of the ancestors of today's Aboriginal Australians by land bridges and short sea crossings from what is now Southeast Asia. The Aboriginal people spread throughout the continent, adapting to diverse environments and climate change to develop one of the oldest continuous cultures on Earth.

At the time of first European contact, estimates of the Aboriginal population range from 300,000 to one million. They were complex...
