Five key garment projects to get readers started and build confidence Projects gradually increase in difficulty, allowing new sewers to build up their skills and knowledge Includes downloadable patterns and full instructions for pajama shorts and a t-shirt

Stress Free Sewing

An essential reference book for home sewers, crafters, and sewing enthusiasts at all levels. Sewing can sometimes be stressful and frustrating, even for the best of us. Organised by the stages in a project, from choosing tools, through reading patterns to fitting waistlines and adding buttons and zips, all the information is presented so you know exactly where to look when you get stuck with a problem. Illustrated entries cover every aspect and item in the sewing process, with each entry providing the characteristics, pros and cons, and basic considerations of working with that item. Icons alert the reader to whether tips relate to buying and choosing materials: using and working with them; techniques and best practice hints; or health and safety considerations. Cross references take you between chapters so you can see how different aspects relate to each other, offering troubleshooting tips that offer advice on how to deal with virtually any sewing situation. A detailed contents list combined with an index at the front of the book make it extremely easy to flick through and find information.

My Sewing Machine Book

Completely revised and updated, Evaluation of Human Work is a compendium of ergonomics methods and techniques that is both broad and deep. The editors have once again brought together a team of world-renowned experts and created a forum for them to introduce their most valued techniques and methods. Almost every chapter has been revised and several new chapters have been added. See what's new in the Third Edition: Sociotechnical design of work systems Team design and evaluation Learning from failures through a joint cognitive systems perspective The Analysis of organizational processes Techniques in user-centered design Increased understanding of the nature of knowledge and knowledge management in contemporary systems Environment surveys Systems for near miss reporting and analysis The one thing that has remained unchanged from the first and second editions is that this text is produced NOT as a cookbook of ergonomics methods. The editor places ergonomics methodology in context, and each chapter carefully describes the background to method development in that area and the application of methods and tools. Exploring the topic of ergonomics/human factors from a 'doing it' perspective, the book serves as a guide to what ergonomics can offer industry, business, or human service professionals and a reference for practicing ergonomists.

Occupational Safety and Health

This book reports on cutting-edge findings and developments in physical, social and occupational ergonomics. It covers a broad spectrum of studies and evaluation procedures concerning physical and mental workload, work posture and ergonomic risk. Further, it reports on significant advances in the design of services and systems, including those addressing special populations, for purposes such as health, safety and education, and discusses solutions for a better and safer integration of humans, automated systems and digital technologies. The book also analyzes the impact of culture on people's cognition and behavior, providing readers with timely

insights into theories on cross-cultural decision-making, and their diverse applications for a number of purposes in businesses and societies. Based on three AHFE 2020 conferences (the AHFE 2020 Virtual Conference on Physical Ergonomics and Human Factors, the AHFE 2020 Virtual Conference on Social & Occupational Ergonomics, and the AHFE 2020 Virtual Conference on Cross-Cultural Decision Making), it provides readers with a comprehensive overview of the current challenges in physical, social and occupational ergonomics, including those imposed by technological developments, highlights key connections between them, and puts forward optimization strategies for sociotechnical systems, including their organizational structures, policies and processes.
