From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent - and loud - fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it - personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

The Land of Promise

The family business is a global phenomenon, and is particularly prominent in tourism and hospitality. In many cases, the family business was developed for the purpose of facilitating personal and family goals. For example, in rural areas, farmers can use tourism as a way to generate additional income, thereby remaining in the area and retaining family property. Running a bed and breakfast establishment is a way to mix family and work. Lifestyle, locational and autonomy motives are the norm, but profit and growth-oriented entrepreneurs are also found within family businesses. This book is the first academic treatment of family business issues within the tourism and hospitality industry. It provides comprehensive assessment of ownership, management and family-related concerns across the entire business and family life cycle. Many new international case studies of real family businesses are used to illustrate key points. The book will be of significant interest to researchers and students in tourism and hospitality, small business and entrepreneurship studies, as well as to owners and potential investors in family businesses.
