

Simple Picaxe 08m2 Circuits

PICAXE

temperature measurement All current PICAXE chips have at least 2048 bytes of on board program memory available for user programs: 08M2

2048 bytes 14M2 - 2048 18M2+ - PICAXE is a microcontroller system based on a range of Microchip PIC microcontrollers. PICAXE devices are Microchip PIC devices with pre-programmed firmware that enables bootloading of code directly from a PC, simplifying hobbyist embedded development (not unlike the Arduino and Parallax BASIC Stamp systems). PICAXE devices have been produced by Revolution Education (Rev-Ed) since 1999.
