Holistic grading

standards-based education, is an approach to scoring essays using a simple grading structure that bases a grade on a paper's overall quality. This type of grading,

Holistic grading or holistic scoring, in standards-based education, is an approach to scoring essays using a simple grading structure that bases a grade on a paper's overall quality. This type of grading, which is also described as nonreductionist grading, contrasts with analytic grading, which takes more factors into account when assigning a grade. Holistic grading can also be used to assess classroom-based work. Rather than counting errors, a paper is judged holistically and often compared to an anchor paper to evaluate if it meets a writing standard. It differs from other methods of scoring written discourse in two basic ways. It treats the composition as a whole, not assigning separate values to different parts of the writing. And it uses two or more raters, with the final score derived...

General semantics

the International Society of General Semantics—now merged with the Institute of General Semantics. A selection of essays and short excerpts from different

General semantics is a school of thought that incorporates philosophic and scientific aspects. Although it does not stand on its own as a separate school of philosophy, a separate science, or an academic discipline, it describes itself as a scientifically empirical approach to cognition and problem solving. It has been described by nonproponents as a self-help system, and it has been criticized as having pseudoscientific aspects, but it has also been favorably viewed by various scientists as a useful set of analytical tools albeit not its own science.

General semantics is concerned with how phenomena (observable events) translate to perceptions, how they are further modified by the names and labels we apply to them, and how we might gain a measure of control over our

Outline (list)

several varieties. A sentence outline is a tool for composing a document, such as an essay, a paper, a book, or even an encyclopedia. It is a list used to organize

An outline, also called a hierarchical outline, is a list arranged to show hierarchical relationships and is a type of tree structure. An outline is used to present the main points (in sentences) or topics (terms) of a given subject. Each item in an outline may be divided into additional sub-items. If an organizational level in an outline is to be sub-divided, it shall have at least two subcategories, although one subcategory is acceptable on the third and fourth levels, as advised by major style manuals in current use. An outline may be used as a drafting tool of a document, or as a summary of the content of a document or of the knowledge in an entire field. It is not to be confused with the general context of the term "outline", which is a summary or overview of a subject presented verbally...

IB Diploma Programme

and is marked by a teacher in the school. A sample of at least five per subject at each level from a school will also be graded by a moderator appointed

The International Baccalaureate Diploma Programme (IBDP) is a two-year educational programme primarily aimed at 16-to-19-year-olds in 140 countries around the world. The programme provides an internationally accepted qualification for entry into higher education and is recognized by many universities worldwide. It was developed in the early-to-mid-1960s in Geneva, Switzerland, by a group of international educators. After a six-year pilot programme that ended in 1975, a bilingual diploma was established.

Administered by the International Baccalaureate (IB), the IBDP is taught in schools in over 140 countries, in one of five languages: Chinese, English, French, German, or Spanish. To offer the IB diploma, schools must be certified as an IB school. IBDP students complete assessments in six subjects...

SAT

essay length versus essay score on the new SAT from released essays and found a high correlation between them. After studying over 50 graded essays,

A Level General Paper Sample Essays

The SAT (ess-ay-TEE) is a standardized test widely used for college admissions in the United States. Since its debut in 1926, its name and scoring have changed several times. For much of its history, it was called the Scholastic Aptitude Test and had two components, Verbal and Mathematical, each of which was scored on a range from 200 to 800. Later it was called the Scholastic Assessment Test, then the SAT I: Reasoning Test, then the SAT Reasoning Test, then simply the SAT.

The SAT is wholly owned, developed, and published by the College Board and is administered by the Educational Testing Service. The test is intended to assess students' readiness for college. Historically, starting around 1937, the tests offered under the SAT banner also included optional subject-specific SAT Subject Tests...

Statistical inference

properties of a population, for example by testing hypotheses and deriving estimates. It is assumed that the observed data set is sampled from a larger population

Statistical inference is the process of using data analysis to infer properties of an underlying probability distribution. Inferential statistical analysis infers properties of a population, for example by testing hypotheses and deriving estimates. It is assumed that the observed data set is sampled from a larger population.

Inferential statistics can be contrasted with descriptive statistics. Descriptive statistics is solely concerned with properties of the observed data, and it does not rest on the assumption that the data come from a larger population. In machine learning, the term inference is sometimes used instead to mean "make a prediction, by evaluating an already trained model"; in this context inferring properties of the model is referred to as training or learning (rather than inference...

Statistical significance

Fisher suggested a probability of one in twenty (0.05) as a convenient cutoff level to reject the null hypothesis. In a 1933 paper, Jerzy Neyman and

In statistical hypothesis testing, a result has statistical significance when a result at least as "extreme" would be very infrequent if the null hypothesis were true. More precisely, a study's defined significance level, denoted by

A Level General Paper Sample Essays

α

$\{\displaystyle \alpha \}$

, is the probability of the study rejecting the null hypothesis, given that the null hypothesis is true; and the p-value of a result,

p

$\{\displaystyle p\}$

, is the probability of obtaining a result at least as extreme, given that the null hypothesis is true. The result is said to be statistically significant, by the standards of the study, when

p

$\leq$

α

$\{\displaystyle p\leq \alpha \}$

. The significance...

Why Most Published Research Findings Are False

published findings are likely false positive results. While the general arguments in the paper recommending reforms in scientific research methodology were

"Why Most Published Research Findings Are False" is a 2005 essay written by John Ioannidis, a professor at the Stanford School of Medicine, and published in PLOS Medicine. It is considered foundational to the field of metascience.

In the paper, Ioannidis argued that a large number, if not the majority, of published medical research papers contain results that cannot be replicated. In simple terms, the essay states that scientists use hypothesis testing to determine whether scientific discoveries are significant. Statistical significance is formalized in terms of probability, with its p-value measure being reported in the scientific literature as a screening mechanism. Ioannidis posited assumptions about the way people perform and report these tests; then he constructed a statistical model which...

GCSE

or the more academically challenging O-Level (General Certificate of Education (GCE) Ordinary Level) exams, or a combination of the two, in various subjects

The General Certificate of Secondary Education (GCSE) is an academic qualification in a range of subjects taken in England, Wales and Northern Ireland, having been introduced in September 1986 and its first exams taken in 1988. State schools in Scotland use the Scottish Qualifications Certificate instead. However, private schools in Scotland often choose to follow the English GCSE system.

Each GCSE qualification is offered as a specific school subject, with the most commonly awarded ones being English literature, English language, mathematics, science (combined & separate), history, geography, art, design and technology (D&T), business studies, economics, music, and modern foreign languages (e.g., Spanish, French, German) (MFL).

The Department for Education has drawn up a list of core subjects...

Living in a Tree

in December 2019, which includes full score essay samples, reviews, etc. Another book, "Selected Essays on Discourse", is priced at 30 yuan and the content

"Living in a Tree" (simplified Chinese: 树上生活; traditional Chinese: 樹上生活; pinyin: Shēnghuó zài shù shàng) was an essay question as part of the national unified examination for the enrollment of ordinary higher education institutions in the People's Republic of China in July 2020. A test room essay created by a candidate in Zhejiang Province during a Chinese language exam. The article extensively cites famous quotes and words. In the evaluation of college entrance examination essays. The first examiner gave a score of 39, while the second and third examiners gave a score of 55. After final review, this article received a full score of 60.

This article became popular after it was published on the WeChat official account of a journal editing group hosted by Zhejiang International Studies University...
