Article One of the Constitution of the United States establishes the legislative branch of the federal government, the United States Congress. Under Article One, Congress is a bicameral legislature consisting of the House of Representatives and the Senate. Article One grants Congress enumerated powers and the ability to pass laws "necessary and proper" to carry out those powers. Article One also establishes the procedures for passing a bill and places limits on the powers of Congress and the states from abusing their powers.

Article One's Vesting Clause grants all federal legislative power to Congress and establishes that Congress consists of the House of Representatives and the Senate. In combination with the vesting clauses of Article Two and Article Three, the Vesting Clause of Article One...

Article Two of the United States Constitution establishes the executive branch of the federal government, which carries out and enforces federal laws. Article Two vests the power of the executive branch in the office of the president of the United States, lays out the procedures for electing and removing the president, and establishes the president's powers and responsibilities.

Section 1 of Article Two establishes the positions of the president and the vice president, and sets the term of both offices at four years. Section 1's Vesting Clause declares that the executive power of the federal government is vested in the president and, along with the

In the United States, judicial review is the legal power of a court to determine if a statute, treaty, or administrative regulation contradicts or violates the provisions of existing law, a state constitution, or ultimately the United States Constitution. While the U.S. Constitution does not explicitly define the power of judicial review, the authority for judicial review in the United States has been inferred from the structure, provisions, and history of the Constitution.

Two landmark decisions by the U.S. Supreme Court served to confirm the inferred constitutional authority for judicial review in the United States. In 1796, *Hylton v. United States* was the first case decided by the Supreme Court involving a direct challenge to the constitutionality of an act of Congress, the Carriage Act...

The constitution of the United Kingdom comprises the written and unwritten arrangements that establish the United Kingdom of Great Britain and Northern Ireland as a political body. Unlike in most countries, no official attempt has been made to codify such arrangements into a single document, thus it is known as an uncodified constitution. This enables the constitution to be easily changed as no provisions are formally entrenched.

The Supreme Court of the United Kingdom and its predecessor, the Appellate Committee of the House of Lords, have recognised and affirmed constitutional principles such as parliamentary sovereignty, the rule of law, democracy, and upholding international law. It also recognises that some Acts of Parliament have special constitutional status. These include Magna Carta...

The Fifth Amendment (Amendment V) to the United States Constitution creates several constitutional rights, limiting governmental powers focusing on criminal procedures. It was ratified, along with nine other amendments, in 1791 as part of the Bill of Rights.

The Supreme Court has extended most, but not all, rights of the Fifth Amendment to the state and local levels. This means that neither the federal, state, nor local governments may deny people rights protected by the Fifth Amendment. The Court furthered most protections of this amendment through the Due Process Clause of the Fourteenth Amendment.

One provision of the Fifth Amendment requires that most felonies be tried only upon indictment by a grand jury, which the Court ruled does not apply to the state level. Another provision, the Double...

Chng Suan Tze v. Minister for Home Affairs is a seminal case in administrative law decided by the Court of Appeal of Singapore in 1988. The Court decided the appeal in the appellants' favour on a technical ground, but considered obiter dicta the reviewability of government power in preventive detention cases under the Internal Security Act ("ISA"). The case approved the application by the court of an objective test in the review of government discretion under the ISA, stating that all power has legal limits and the rule of law demands that the courts should be able to examine the exercise of discretionary power. This was a landmark shift from the position in the 1971 High Court decision Lee Mau Seng v. Minister of Home Affairs, which had been an authority for the application of a subjective...

Marbury v. Madison, 5 U.S. (1 Cranch) 137 (1803), was a landmark decision of the U.S. Supreme Court that established the principle of judicial review, meaning that American courts have the power to strike down laws and statutes they find to violate the Constitution of the United States. Decided in 1803, Marbury is regarded as the single most important decision in American constitutional law. It established that the U.S. Constitution is actual law, not just a statement of political principles and ideals. It also helped define the boundary between the constitutionally separate executive and judicial branches of the federal government.

The case originated in early 1801 and stemmed from the rivalry between outgoing President John Adams and incoming President Thomas Jefferson. Adams, a member of...

The First Amendment (Amendment I) to the United States Constitution prevents Congress from making laws respecting an establishment of religion; prohibiting the free exercise of religion; or abridging the freedom of speech, the freedom of the press, the freedom of assembly, or the right to petition the government for redress of grievances. It was adopted on December 15, 1791, as one of the ten amendments that constitute the Bill of Rights. In the original draft of the Bill of Rights, what is now the First Amendment occupied third place. The first two articles were not ratified by the states, so the article on disestablishment and free speech ended up being first.

The Bill of Rights was proposed to assuage Anti-Federalist opposition to Constitutional ratification. Initially, the First Amendment...

The 2018 periodic review of Westminster constituencies was an ultimately unfruitful cycle of the process by which constituencies of the

House of Commons of the United Kingdom are reviewed and redistributed. The four UK boundary commissions carried out their reviews between 2016 and 2018, but their recommendations were not taken up by the government and were formally laid aside in 2020.

The boundary commissions were to take into account revised rules for the number and size (electoral quota) of constituencies. The proposed changes included having a total of 600 seats rather than 650, as agreed by Parliament in 2011 to meet a reformist aim of the 2010–2015 coalition agreement.

The 2013 periodic review of Westminster constituencies began in 2011 and was intended to be completed by 2013, but a...
