

Collaborative Resilience Moving Through Crisis To Opportunity

Family resilience

individual resilience factors are not always the same. Family factors consist of stress management, emotion regulation skills, collaborative goal setting

An important part of the heritage of family resilience is the concept of individual psychological resilience which originates from work with children focusing on what helped them become resilient in the face of adversity. Individual resilience emerged primarily in the field of developmental psychopathology as scholars sought to identify the characteristics of children that allowed them to function "OK" after adversity. Individual resilience gradually moved into understanding the processes associated with overcoming adversity, then

Collaborative Resilience Moving Through Crisis To Opportunity

into prevention and intervention and now focuses on examining how factors at multiple levels of the system (e.g., molecular, individual, family, community) and using interdisciplinary approaches (e.g., medical, social services, education) promote resilience. Resilience...

Crisis management

Effective crisis communication: Moving from crisis to opportunity. Thousand Oaks, CA: Sage Publications. Crisis Management: A review of strategic crisis management

Crisis management is the process by which an organization deals with a disruptive and unexpected event that threatens to harm the organization or its stakeholders. The study of crisis management originated with large-scale industrial and environmental disasters in the 1980s. It is considered to be the most important process in public relations.

Three elements are common to a crisis: (a) a threat to the organization, (b) the element of surprise, and (c) a short decision time.

Venette argues that "crisis is a process of transformation where the old system can no longer be maintained". Therefore, the fourth defining quality is the need for change. If

people, 53% of whom live under the national poverty line and 90% of whom live on less than \$2 per day.

The United Nations Children's Fund (UNICEF) estimated that there are 46,000 severely malnourished children in Malawi. In 2023, UNICEF warned that over 500,000 Malawian children in Malawi faced the risk of malnutrition. Today, many programs are put in place in Malawi to address climate instability, poverty and diversification in term of both the economy and agriculture.

resilience to crime. Côte

Crime in Côte d'Ivoire is prevalent and versatile across the West African country. The most common forms of crime include child labour, arms trafficking, terrorism and human rights abuse. Other less common, but still evident types of crime include cannabis and synthetic drug trade, sex trafficking, fauna and flora crimes, cybercrime.

The European Union funded Enhancing Africa's Response to Transnational Organised Crime (ENACT) programme created a ten-point index score based on national criminality and resilience to crime. Côte d'Ivoire has the fourth highest Criminality Score (6.23) in Africa and the second highest Criminality Score in West Africa, after Nigeria (7.70). Ivory Coast is part of the 37% of countries in Africa that have a high crime, but a low resilience to crime index score along...

The St. Augustine movement was a part of the wider Civil Rights Movement, taking place in St. Augustine, Florida from 1963 to 1964. It was a major event in the city's long history and had a role in the passage of the Civil Rights Act of 1964.

Supply chain management

research in supply chain management is concerned with topics related to resilience, sustainability, and risk management, among others. Some suggest that

In commerce, supply chain management (SCM) deals with a system of procurement (purchasing raw materials/components), operations management, logistics and marketing channels, through which raw materials can be developed into finished products and delivered to their end customers. A more narrow definition of supply chain management is the "design, planning, execution, control, and monitoring of supply chain activities with the objective of creating net value, building a competitive infrastructure, leveraging worldwide logistics, synchronising supply with demand and measuring performance globally". This can include the movement and storage of raw

materials, work-in-process inventory, finished goods, and end to end order fulfilment from the point of origin to the point of consumption. Interconnected...

Business model

responses to a survey defines business models as the design of organizational structures to enact a commercial opportunity. Further extensions to this design

A business model describes how a business organization creates, delivers, and captures value, in economic, social, cultural or other contexts. The model describes the specific way in which the business conducts itself, spends, and earns money in a way that generates profit. The process of business model construction and modification is also called business model innovation and forms a part of business strategy.

In theory and practice, the term business model is used for a broad range of informal and formal descriptions to represent core aspects of an organization or business, including purpose, business process, target customers, offerings, strategies, infrastructure, organizational structures,
