The Honda VTX series is a line of V-twin Honda cruiser motorcycles inspired by the Zodia concept shown at the 1995 Tokyo Motor Show. The Honda VTX 1800 was launched in 2001 as a 2002 model. At the time this bike was introduced the Honda VTX engine was the largest displacement production V-twin in the world, but that distinction would be short-lived as the VTX1800 was superseded in 2004 by the 2.0-litre Kawasaki Vulcan 2000. Nevertheless, the VTX 1800 still produced better 0-60 mph and 1/4 mile times.

VTX stands for V-Twin Extreme. The VTX1300 line was introduced for the

2003 model year, which evolved into the VT1300C line starting with the 2010 model year.

In addition to the 52° V-twin layout, commonalities for the 1800 and 1300 powertrains include:

The N360 featured front wheel drive and an air-cooled, four-stroke, 354 cc, 31 PS (23 kW; 31 hp) two-cylinder engine. While ultimately derived from...
