Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

ERDI Standards and Procedures Manual

"Equal Justice Under Law" is one of America's most proudly proclaimed and widely violated legal principles. But it comes nowhere close to describing the legal system in practice. Millions of Americans lack any access to justice, let alone equal access. Worse, the increasing centrality of law in American life and its growing complexity has made access to legal assistance critical for all citizens. Yet according to most estimates about four-fifths of the legal needs of the poor, and two- to three-fifths of the needs of middle-income individuals remain unmet. This book reveals the inequities of legal assistance in America, from the lack of access to educational services and health benefits to gross injustices in the criminal defense system. It proposes a specific agenda for change, offering tangible reforms for coordinating comprehensive systems for the delivery of legal services, maximizing individual's opportunities to represent themselves, and making effective legal services more affordable for all Americans who need them.
