New Directions in Assessing Historical Thinking

New technologies have radically transformed our relationship to information in general and to little bits of information in particular. The assessment of history learning, which for a century has valued those little bits as the centerpiece of its practice, now faces not only an unprecedented glut but a disconnect with what is valued in history education. More complex processes—historical thinking,

historical consciousness or historical sense making—demand more complex assessments. At the same time, advances in scholarship on assessment open up new possibilities. For this volume, Kadriye Ercikan and Peter Seixas have assembled an international array of experts who have, collectively, moved the fields of history education and assessment forward. Their various approaches negotiate the sometimes-conflicting demands of theoretical sophistication, empirically demonstrated validity and practical efficiency. Key issues include articulating the cognitive goals of history education, the relationship between content and procedural knowledge, the impact of students' language literacy on history assessments, and methods of validation in both large scale and classroom assessments. *New Directions in Assessing Historical Thinking* is a critical, research-oriented resource that will advance the conceptualization, design and validation of the next generation of history assessments.

World History : Perspectives on the Past

This series of textbooks is aimed at teacher training students and comprises two concerns: the practice of teaching and how to use theory and research findings to improve that practice, and how to meet the TTA standards whilst placing them in a wider context. This comprehensive textbook is an accessible guide to all those who are new to the profession of teaching history. Covering all aspects of the job, from planning through to teaching and assessment, Rob Phillips provides

constructive, practical advice to help subject teachers become more effective in their work\u003e

World History

This innovative textbook demystifies the subject of world history through a diverse range of case studies. Each chapter looks at an event, person, or place commonly included in comprehensive textbooks, from prehistory to the present and from across the globe - from the Kennewick Man to gladiators and modern-day soccer and globalization - and digs deeper, examining why historians disagree on the subject and why their debates remain relevant today. By taking the approach of 'unwrapping the textbook,' David Eaton reveals how historians think, making it clear that the past is not nearly as tidy as most textbooks suggest. Provocative questions like whether ancient Greece was shaped by contact with Egypt provide an entry point into how history professors may sharply disagree on even basic narratives, and how historical interpretations can be influenced by contemporary concerns. By illuminating these historiographical debates, and linking them to key skills required by historians, World History through Case Studies shows how the study of history is relevant to a new generation of students and teachers.

Essential Modern World History

The *New World History* is a comprehensive volume of essays selected to enrich world history teaching and scholarship in this rapidly expanding field. The forty-four articles in this book take stock of the history, evolving literature, and current trajectories of new world history. These essays, together with the editors' introductions to thematic chapters, encourage educators and students to reflect critically on the development of the field and to explore concepts, approaches, and insights valuable to their own work. The selections are organized in ten chapters that survey the history of the movement, the seminal ideas of founding thinkers and today's practitioners, changing concepts of world historical space and time, comparative methods, environmental history, the "big history" movement, globalization, debates over the meaning of Western power, and ongoing questions about the intellectual premises and assumptions that have shaped the field.

A Companion to World History

The first comprehensive overview of the innovative new discipline of global history Until very recently, historians have looked at the past with the tools of the nineteenth century. But globalization has fundamentally altered our ways of knowing, and it is no longer possible to study nations in isolation or to understand world history as emanating from the West. This book reveals

why the discipline of global history has emerged as the most dynamic and innovative field in history—one that takes the connectedness of the world as its point of departure, and that poses a fundamental challenge to the premises and methods of history as we know it. *What Is Global History?* provides a comprehensive overview of this exciting new approach to history. The book addresses some of the biggest questions the discipline will face in the twenty-first century: How does global history differ from other interpretations of world history? How do we write a global history that is not Eurocentric yet does not fall into the trap of creating new centrism? How can historians compare different societies and establish compatibility across space? What are the politics of global history? This in-depth and accessible book also explores the limits of the new paradigm and even its dangers, the question of whom global history should be written for, and much more. Written by a leading expert in the field, *What Is Global History?* shows how, by understanding the world's past as an integrated whole, historians can remap the terrain of their discipline for our globalized present.

Cracking the AP World History Exam 2016, Premium Edition

World history has expanded dramatically in recent years, primarily as a teaching field, and increasingly as a research field. Growing numbers of teachers and Ph.Ds in history are required to teach the subject. They must be current on topics from human evolution to industrial development in Song-dynasty China to today's disease patterns - and then link these disparate topics into a coherent course. Numerous textbooks in print and in preparation summarize the field of world history at an introductory level. But good teaching also requires advanced training for teachers, and access to a stream of new research from scholars trained as world historians. In this book, Patrick Manning provides the first comprehensive overview of the academic field of world history. He

reviews patterns of research and debate, and proposes guidelines for study by teachers and by researchers in world history.

World History Through Case Studies

This series is targeted at AQA Modern World History specification B. It provides all the information students will need for paper one and paper two, with exam-style questions to help them prepare for the exam proper. Differentiated resources in Core and Foundation editions mean the series can be used with all students, whatever their individual ability. This revision guide concentrates on improving the students' grades by summarizing key issues and highlighting practical issues concerning exam performance.

The New World History

This book offers the tools teachers need to get started with a more thoughtful and compelling approach to teaching history, one that develops literacy and higher-order thinking skills, connects the past to students' lives today, and meets social studies 3C standards and most state standards (grades 6–12). The author provides over 90 primary sources organized into seven thematic units, each structured around an essential question from world history. As students analyze carefully excerpted documents—including speeches by queens and rebels, ancient artifacts, and social media posts—they build an understanding of how diverse historical figures have approached key issues. At the same time, students learn to participate in civic debates and develop their own views on what it

means to be a 21st-century citizen of the world. Each unit connects to current events with dynamic classroom activities that make history come alive. In addition to the documents themselves, this teaching manual provides strategies to assess student learning; mini-lectures designed to introduce documents; activities and reproducibles to help students process, display, and integrate their learning; guidance to help teachers create their own units; guidelines for respectful student debate and discussion; and more. Book Features: A timely aid for secondary school teachers tasked with meeting standards and other state-level quality requirements. An approach that promotes student engagement and critical thinking to replace or augment a traditional textbook. Challenges to the “master narrative” of world history from figures like Queen Nzinga and Huda Sha’arawi, as well as traditionally recognized historical figures such as Pericles and Napoleon. Essential questions to help students explore seven of the most important recurring themes in world history. Role-plays and debates to promote interaction among students. Printable copies of the documents included in the book can be downloaded at tcpress.com.
