

Centaur Legacy Touched 2 Nancy Straight

Centaur Legacy

Camille and Drake are on the run from the head of the Centaur Council, seeking the mythical pasture of Thessaly and a family heirloom that may keep them safe. They don't know who to trust or where to hide.

Centaur Legacy

Camille and Drake are on the run from the head of the Centaur Council, seeking the mythical pasture of Thessaly and a family heirloom that may keep them safe. As their journey progresses from the rolling hills of Ireland to the snow covered forests of South Dakota, Cami learns more about her mother's secrets, including a twin brother and a Centaur legacy that puts a death warrant on her entire family. Camille and Drake don't know who to trust or where to hide. Camille's family is quick to come to her aid, but who among them can be trusted? A supernatural benefactor forces Drake to choose between being the man he wants to be and the Centaur warrior Camille needs him to be.

Centaur Redemption

It had just been the two of them; before her mother's last breath, she gave Camille the information she had craved her entire life: the identity of her father. Daring to contact him, Camille was welcomed by an entire family she never knew existed. Her family claims a legendary heritage tracing back to a Centaur touched by Zeus.

Blood Debt

Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations. Autonomous Horizons: The Way Forward identifies issues and makes recommendations for the Air Force to take full advantage of this transformational technology.

Autonomous Horizons

The book draws on the evidence of landscape archaeology, palaeoenvironmental studies, ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape. It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable. The premise is that archaeologists tend to focus on 'sites' while neglecting the patterns of habitual movement that made them part of living landscapes. Evidence of past movement is considered in a multi-scalar way from the individual footprint to the long distance path including the traces created in vegetation by animal and human movement. It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations. In other instances radical changes of axes of communication and landscape structures provide evidence of upheaval and social change. Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning, animal movement, faeces deposition and transplantation which can create readable routes along which are favoured resources. Evidence from European hunter-gatherer sites hints at similar practices of niche construction on a range of spatial scales. On a local scale, footprints help to establish axes of movement, the locations of lost settlements and activity areas. Wood trackways likewise provide evidence of favoured patterns of movement and past settlement location. Among early farming communities alignments of burial mounds, enclosure entrances and other monuments indicate axes of communication. From the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields. Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long-term continuity of routeways. Where fields flank routeways a range of methods, including scientific approaches, provide dates. Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and rather better evidence for early routes crossing topography and providing connections between different environmental zones. The book concludes with a case study of the Weald of South East England which demonstrates that some axes of cross topographic movement used as droveways, and generally considered as early medieval, can be shown to be of prehistoric origin. One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the parts played by riverine and maritime longer distance communication. It is argued that understanding the origins of the paths we use today contributes to appreciation of the distinctive qualities of landscapes. Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of connectivity between different landscape zones including fragmented nature reserves and valued places. In these ways an understanding of past routeways can contribute to sustainable landscapes, communities

and quality of life

Making One's Way in the World

Camille and Drake leave the country pursued by the Lost Herd as well as by Centaur Council enforcers. Camille's twin brother has been manipulated by the Countil and he is now Camille's enemy.

Centaur Rivalry

In this thrilling sequel, Gemma continues to pursue her destiny to bind the magic of the Realms and restore it to the Order. Gemma and her friends from Spence use magical power to transport themselves on visits from their corseted world of Victorian London (at the height of the Christmas season), to the visionary country of the Realms, with its strange beauty and menace. There they search for the lost Temple, the key to Gemma's mission, and comfort Pippa, their friend who has been left behind in the Realms. After these visits they bring back magical power for a short time to use in their own world. Meanwhile, Gemma is torn between her attraction to the exotic Kartik, the messenger from the opposing forces of the Rakshana, and the handsome but clueless Simon, a young man of good family who is courting her. This is the second book in Libba Bray's engrossing trilogy, set in a time of strict morality and barely repressed sensuality, about a girl who saw another way.

Rebel Angels

Presents five hundred-one critical reading questions to prepare for the SAT I and other tests and includes skill builders on different subject matter such as U.S. history and politics, arts and humanities, health and medicine, literature and music, sports, science, and social studies.

501 Critical Reading Questions

This English translation, with introduction and notes, an extensive glossary, maps, and topical bibliographies, explores religious authority and revealed knowledge and is indispensable for the study of Homer, heroes, literature, religion, and culture in the Roman Empire and Late Antiquity. Paperback edition is available from the Society of Biblical Literature (www.sbl-site.org).

On Heroes

Here, the author assesses our modern book culture by focusing on five key elements including the explosion of retail bookstores like Barnes & Noble and Borders, and the formation of the Oprah Book Club.

The Late Age of Print

Hypersonics is the study of flight at speeds where aerodynamic heating dominates the physics of the problem. It is an engineering science with close links to supersonics and engine design. Within this field, many of the most important results have been experimental. The principal facilities have been wind tunnels and related devices, which have produced flows with speeds up to orbital velocity. Why is this important? Hypersonics has had two major applications. The first has been to provide thermal protection during atmospheric reentry. Success in this enterprise has supported ballistic-missile nose cones, has returned strategic reconnaissance photos from orbit and astronauts from the Moon, and has even dropped an instrument package into the atmosphere of Jupiter. The second application has involved high-speed propulsion and has sought to develop the scramjet as an advanced airbreathing ramjet. Atmospheric entry today is fully mature as an engineering discipline, but work with its applications continues to reach for new achievements. Studies of scramjets still seek full success, in which such engines can accelerate a vehicle without the use of rockets. Hence, there is much to do in this area as well.

Dada, Surrealism and Their Heritage

Exhibition includes approximately 2% of the acquisitions made during the 1990s.

Facing the Heat Barrier

I get this bizarre mirror world filled with a horse/guy who I have the serious hots for, creatures who are terrorising civilisation, deodorant-less armpits that probably stink and no toilet paper. This sucks.

Daniel Deronda

This educational resource packet covers more than 1200 years of medieval art from western Europe and Byzantium, as represented by objects in the collection of The Metropolitan Museum of Art. Among the contents of this resource are: an overview of medieval art and the period; a collection of aspects of medieval life, including knighthood, monasticism, pilgrimage, and pleasures and pastimes; information on materials and techniques medieval artists used; maps; a timeline; a bibliography; and a selection of useful resources, including a list of significant collections of medieval art in the U.S. and Canada and a guide to relevant Web sites. Tote box includes a binder book containing background information, lesson plans, timeline, glossary, bibliography, suggested additional resources, and 35 slides, as well as two posters and a 2 CD-ROMs.

Art for the Nation

Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

Divine by Mistake

This scholarly study of NASA's Marshall Space Flight Center places the institution in social, political, scientific, and technological context. It traces the evolution of Marshall, located in Huntsville, Alabama, from its origins as an Army missile development organization to its status in 1990 as one of the most diversified of NASA's field Centers. Chapters discuss military rocketry programs in Germany and the United States, Apollo-Saturn, Skylab, Space Shuttle, Spacelab, the Space Station and various scientific and technical projects including the Hubble Space Telescope. It sheds light not only on the history of space technology, science, and exploration, but also on the Cold War, federal politics, and complex organizations.

Medieval Art

'Hale's writing is beautiful, with a vivid eye for detail' Daily Telegraph Anidora-Kiladra Talianna Isilee, Crown Princess of Kilindree, spent the first years of her life listening to her aunt's incredible stories, and learning the language of the birds. Little knowing how valuable her aunt's strange knowledge would prove to be when she grew older. From the Grimm's fairy tale of the princess who became a goose girl before she could become a queen, Shannon Hale has woven an incredible, original and magical tale of a girl who must understand her own incredible talents before she can overcome those who wish her harm. Shannon Hale has drawn on her incredible gift for storytelling to create a powerful and magical grown-up fairytale.

Archaeology, Anthropology, and Interstellar Communication

A collection of essays by the art historian Aby Warburg, these essays look beyond iconography to more psychological aspects of artistic creation: the conditions under which art was practised; its social and cultural contexts; and its conceivable historical meaning.

Power to Explore

This book is a printed edition of the Special Issue \"Perspectives on Women's Higher Education Leadership from around the World\" that was published in Administrative Sciences

The Goose Girl

No Marketing Blurb

The Renewal of Pagan Antiquity

The papers in this volume derive from the proceedings of the nineteenth International Bronze Congress, held at the Getty Center and Villa in October 2015 in connection with the exhibition Power and Pathos: Bronze Sculpture of the Hellenistic World. The study of large-scale ancient bronzes has long focused on aspects of technology and production. Analytical work of materials, processes, and techniques has significantly enriched our understanding of the medium. Most recently, the restoration history of bronzes has established itself as a distinct area of investigation. How does this scholarship bear on the understanding of bronzes within the wider history of ancient art? How do these technical data relate to our ideas of styles and development? How has the

material itself affected ancient and modern perceptions of form, value, and status of works of art?

Perspectives on Women's Higher Education Leadership from around the World

Author of the beloved Half Moon Hollow series of vampire romances (Nice Girls Don't Have Fangs), Molly Harper has created a standalone paranormal romance in which a dilapidated haunted house could bring star-crossed lovers together—if it doesn't kill them first! When Nina Linden is hired to landscape a private island off the New England coast, she sees it as her chance to rebuild her failing business after being cheated by her unscrupulous ex. She never expects that her new client, software mogul Deacon Whitney, would see more in her than just a talented gardener. Deacon has paid top dollar to the crews he's hired to renovate the desolate Whitney estate—he had to, because the bumps, thumps, and unexplained sightings of ghostly figures in nineteenth-century dress are driving workers away faster than he can say "Boo." But Nina shows no signs of being scared away, even as she experiences some unnerving apparitions herself. And as the two of them work closely together to restore the mansion's faded glory, Deacon realizes that he's found someone who doesn't seem to like his fortune more than himself—while Nina may have finally found the one man she can trust with her bruised and battered heart. But something on the island doesn't believe in true love...and if Nina and Deacon can't figure out how to put these angry spirits to rest, their own love doesn't stand a ghost of a chance.

The Complete Idiot's Guide to the Sun

This biography examines the long life of the traveller and author Stephen Graham. Graham walked across large parts of the Tsarist Empire in the years before 1917, describing his adventures in a series of books and articles that helped to shape attitudes towards Russia in Britain and the United States. In later years he travelled widely across Europe and North America, meeting some of the best known writers of the twentieth century, including H.G.Wells and Ernest Hemingway. Graham also wrote numerous novels and biographies that won him a wide readership on both sides of the Atlantic. This book traces Graham's career as a world traveller, and provides a rich portrait of English, Russian and American literary life in the first half of the twentieth century. It also examines how many aspects of his life and writing coincide with contemporary concerns, including the development of New Age spirituality and the rise of environmental awareness. Beyond Holy Russia is based on extensive research in archives of private papers in Britain and the USA and on the many works of Graham himself. The author describes with admirable tact and clarity Graham's heterodox and convoluted spiritual quest. The result is a fascinating portrait of a man who was for many years a significant literary figure on both sides of the Atlantic.

Artistry in Bronze

This book is a study of ancient views about 'moral luck'. It examines the fundamental ethical problem that many of the valued constituents of a well-lived life are vulnerable to factors outside a person's control, and asks how this affects our appraisal of persons and their lives. The Greeks made a profound contribution to these questions, yet neither the problems nor the Greek views of them have received the attention they deserve. This book thus recovers a central dimension of Greek thought and addresses major issues in contemporary ethical theory. One of its most original aspects is its interrelated treatment of both literary and philosophical texts. The Fragility of Goodness has proven to be important reading for philosophers and classicists, and its non-technical style makes it accessible to any educated person interested in the difficult problems it tackles. This edition, first published in 2001, features a preface by Martha Nussbaum.

Better Homes and Hauntings

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Beyond Holy Russia

The breakthrough novel from one of the greatest comic writers in the language - one of the twenty selected by Granta as the Best of Young British Writers 2003.

The Fragility of Goodness

Lauren is visited in her dreams for years by a stranger claiming to be her destiny. Destiny becomes reality when paths cross

during a failed robbery attempt. Lauren and the stranger experience chemistry like no other and now her doubt over her long time relationship with her high school sweetheart is not her only secret . . . someone else knows about her keen intuition and sixth sense. A mysterious clairvoyant seeks Lauren out and tells her not only of her life now but what the future may hold. Soon Lauren is in the middle of a murder investigation and a questionable friendship with the key suspect. Law enforcement, friends and family are concerned for Lauren but unfortunately they are unaware of the true danger . . . Sinister forces are at work and will stop at nothing to destroy Lauren's abilities.

The Re-Creating of the Individual; A Study of Psychological Types and Their Relation to Psychoanalysis

Prince of Networks is the first treatment of Bruno Latour specifically as a philosopher. It has been eagerly awaited by readers of both Latour and Harman since their public discussion at the London School of Economics in February 2008. Part One covers four key works that display Latour's underrated contributions to metaphysics: Irreductions, Science in Action, We Have Never Been Modern, and Pandora's Hope. Harman contends that Latour is one of the central figures of contemporary philosophy, with a highly original ontology centered in four key concepts: actants, irreduction, translation, and alliance. In Part Two, Harman summarizes Latour's most important ...

Behindlings

Ancient Rome has always been considered a compendium of City and World. In the Renaissance, an era of epistemic fractures, when the clash between the 'new science' (Copernicus, Galileo, Vesalius, Bacon, etcetera) and the authority of ancient texts produced the very notion of modernity, the extended and expanding geography of ancient Rome becomes, for Shakespeare and the Elizabethans, a privileged arena in which to question the nature of bodies and the place they hold in a changing order of the universe. Drawing on the rich scenario provided by Shakespeare's Rome, and adopting an interdisciplinary perspective, the authors of this volume address the way in which the different bodies of the earthly and heavenly spheres are re-mapped in Shakespeare's time and in early modern European culture. More precisely, they investigate the way bodies are fashioned to suit or deconstruct a culturally articulated system of analogies between earth and heaven, microcosm and macrocosm. As a whole, this collection brings to the fore a wide range of issues connected to the Renaissance re-mapping of the world and the human. It should interest not only Shakespeare scholars but all those working on the interaction between sciences and humanities.

Meeting Destiny

Cybernetic Revelation explores the dual philosophical histories of deconstruction and artificial intelligence, tracing the development of concepts like the \"logos\" and the notion of modeling the mind technologically from pre-history to contemporary thinkers like Slavoj Žižek, Steven Pinker, Bernard Stiegler and Daniel C. Dennett. The writing is clear and accessible throughout, yet the text probes deeply into major philosophers seen by JD Casten as \"conceptual engineers.\" Philosophers covered include: Anaximander, Heraclitus, Parmenides, Plato, Aristotle, Philo, Augustine, Shakespeare, Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, Kant, Hegel, Nietzsche, Freud, Jung, Joyce, Dewey, Wittgenstein, Heidegger, Adorno, Benjamin, Derrida, Chomsky, Žižek, Pinker, Dennett, Hofstadter, Stiegler + more; with special chapters on: AI's history, Complexity, Deconstructing AI, Aesthetics, Consciousness + more...

Prince of Networks: Bruno Latour and Metaphysics

Like music, art is a universal language. Although looking at works of art is a pleasurable enough experience, to appreciate them fully requires certain skills and knowledge.\" --Carol Strickland, from the introduction to The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern * This heavily illustrated crash course in art history is revised and updated. This second edition of Carol Strickland's The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern offers an illustrated tutorial of prehistoric to post-modern art from cave paintings to video art installations to digital and Internet media. * Featuring succinct page-length essays, instructive sidebars, and more than 300 photographs, The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern takes art history out of the realm of dreary textbooks, demystifies jargon and theory, and makes art accessible-even at a cursory reading. * From Stonehenge to the Guggenheim and from Holbein to Warhol, more than 25,000 years of art is distilled into five sections covering a little more than 200 pages.

Questioning Bodies in Shakespeare's Rome

The Grand Tour, a customary trip of Europe undertaken by British nobility and wealthy landed gentry during the seventeenth and eighteenth centuries, played an important role in the formation of contemporary notions of elite masculinity. Examining testimony as written by Grand Tourists, tutors and their families, Goldsmith demonstrates that the Grand Tour educated elite young men in a wide variety of skills, virtues and masculine behaviours that extended well beyond polite society. She argues that dangerous experiences were far more central to the Tour as a means of constructing Britain's next generation of leaders than has previously been examined. Influenced by aristocratic concepts of honour and inspired by military leadership, elites viewed experiences of danger and hardship as powerfully transformative and therefore as central to the process of constructing masculinity. Far from viewing danger as a disruptive force, Grand Tourists willingly tackled a variety of social, geographical and

physical perils, gambling their way through treacherous landscapes; scaling mountains, volcanoes and glaciers; and encountering war and disease. Through the study of danger, Goldsmith offers a revision of eighteenth-century elite masculine culture and the critical role the Grand Tour played within this.

Cybernetic Revelation

The noted cultural anthropologist and author of 'The Interpretation of Cultures' deepens our understanding of human societies through the intimacies of 'local knowledge.'

The Annotated Mona Lisa

This book takes a dramatically original approach to the history of humanity, using objects which previous civilisations have left behind them, often accidentally, as prisms through which we can explore past worlds and the lives of the men and women who lived in them. The book's range is enormous. It begins with one of the earliest surviving objects made by human hands, a chopping tool from the Olduvai gorge in Africa, and ends with an object from the 21st century which represents the world we live in today. Neil MacGregor's aim is not simply to describe these remarkable things, but to show us their significance - how a stone pillar tells us about a great Indian emperor preaching tolerance to his people, how Spanish pieces of eight tell us about the beginning of a global currency or how an early Victorian tea-set tells us about the impact of empire. Each chapter immerses the reader in a past civilisation accompanied by an exceptionally well-informed guide. Seen through this lens, history is a kaleidoscope - shifting, interconnected, constantly surprising, and shaping our world today in ways that most of us have never imagined. An intellectual and visual feast, it is one of the most engrossing and unusual history books published in years.

Masculinity and Danger on the Eighteenth-century Grand Tour

Fonthill, in Wiltshire, is traditionally associated with the writer and collector William Beckford who built his Gothic fantasy house called Fonthill Abbey at the end of the eighteenth century. The collapse of the Abbey's tower in 1825 transformed the name Fonthill into a symbol for overarching ambition and folly, a sublime ruin. Fonthill is, however, much more than the story of one man's excesses. Beckford's Abbey is only one of several important houses to be built on the estate since the early sixteenth century, all of them eventually consumed by fire or deliberately demolished, and all of them oddly forgotten by historians. Little now remains: a tower, a stable block, a kitchen range, some dressed stone, an indentation in a field. Fonthill Recovered draws on histories of art and architecture, politics and economics to explore the rich cultural history of this famous Wiltshire estate. The first half of the book traces the occupation of Fonthill from the Bronze Age to the twenty-first century. Some of the owners surpassed Beckford in terms of their wealth, their collections, their political power and even, in one case, their sexual misdemeanours. They include Charles I's Chancellor of the Exchequer, and the richest commoner in the nineteenth century. The second half of the book consists of essays on specific topics, filling out such crucial areas as the complex history of the designed landscape, the sources of the Beckfords' wealth and their collections, and one essay that features the most recent appearance of the Abbey in a video game.
