Fundamentals of Training for Security Officers

At this moment in time, when the world is only just beginning to recover from the global impact of the COVID-19 pandemic, the research in this book makes for essential reading. It will serve to help re-establish confidence and reduce anxiety in business and leisure travellers who are planning to embark on new travel experiences in a world impacted by longer-lasting armed conflicts, increased global violence, and higher frequencies of natural disasters. This book blends in-depth academic research around global risk mitigation with unique perspectives on business and leisure travel safety, narrated by authors who have extensive knowledge of security and risk mitigation systems. Each page contains easy-to-follow advice for domestic and international travel, but differs from other books, in that it addresses the 'hard' issues of travel safety (such as theoretical research around risk mitigation), in lieu of setting the focus solely on the 'soft' issues (like itinerary planning) which tend to be the focus of many travel publications today. Moreover, unique to this book is an extreme travel section adapted to business and leisure travellers, which makes for compelling reading and deals with kidnapping, risk mitigation and contingency planning. It incorporates the real-life experiences of one of the authors, who survived torture and abduction, and whose experiences now inform pre-deployment training for Australian Defence Force personnel for operations in armed conflict. This book blends the female and male voice into a narrative that combines the perspectives of professional security experts with common sense travel advice. The research that has gone into this book is essential reading for anyone who intends to embark on business or leisure travel, either in their own country or overseas, or who is interested in studying travel from an academic viewpoint.

Executive Protection

"Security is mostly a superstition. It does not exist in nature, nor do the children of men as a whole experience it. Avoiding danger is no safer in the long run than outright exposure. Life is either a daring adventure, or nothing." -Helen Keller
Danger is around us all the time. If we feel secure it is because we have chosen to ignore the threat or we feel we have taken steps to reduce the threat. Everything we do, however, is merely a deterrent. There are no guarantees. Threat is always present. It is simply a matter of degree. Threats come in many forms and they all eat away at our fundamental sense of security. Personal and professional security focuses on awareness and preparation. Knowledge is power. Those who are aware and prepared are far more likely to survive sudden, unexpected threats. Luck as they say, is when preparation meets opportunity. What does it take to be a prepared security professional? The terrorist attacks on United States soil on September 11, 2001 illustrate how crucial it is that security be prepared and effective. Those attacks happened because we let our guard down, and the ripple effects have altered our society forever. How great a price must we pay in terms of reduced civil liberties to feel safe now? Such questions may be difficult to define but the fundamental duties and responsibilities of security officers are not. If we expect to overcome threats we must all be on the same page. That is why this book is an important tool in societys ongoing mission to raise the bar in the security profession. Preparation requires training and the journey begins here. -Michael James Jaquish

This book is intended to give the Security Officer a preliminary foundation of \"Command Decision\" level so they can understand how to arrive at the best decision for their own safety and that of others they are hired to protect. The Book deals with the Philosophy of the person who enters the field of security and why they have chosen to do so, the Operation of how things work, or the law and process that define how they should act, and the conflict between the two, and how to resolve it in the Function of the work. In many cases, the decision the Security Officer chooses at the time will decide the outcome and level of safety for the officer and citizens they are hired to protect.
