Aston Martin Lagonda Global Holdings PLC () is a British manufacturer of luxury sports cars and grand tourers. Its predecessor was founded in 1913 by Lionel Martin and Robert Bamford. Headed from 1947 by David Brown, it became associated with expensive grand touring cars in the 1950s and 1960s, and with the fictional character James Bond following his use of a DB5 model in the 1964 film *Goldfinger*. Their grand tourers and sports cars are regarded as a British cultural icon.

Aston Martin has held a royal warrant as purveyor of motorcars to Charles III (as Prince of Wales and later as King) since 1982, and has over 160 car dealerships in 53 countries, making it a global automobile brand. The company is traded on the London Stock Exchange and is a constituent of the FTSE 250 Index. In 2003 it...

Nethercutt Collection

Hudson and Pullman Car One of the Collection's storage rooms with an Aston Martin DB9 List of music museums List of automobile museums "As a Merchant of

The Nethercutt Collection is a multi-storied museum and car collection complex located in Sylmar, California. It was founded by J.B. Nethercutt in 1971 and its centerpiece is the prestigious automobile collection of the Nethercutt-Richards family that contains over 250 cars, nearly all of which J.B. originally collected and owned. It is widely regarded as one of the greatest car museums in the world.§

From 1971 to 1994, the collection's San Sylmar penthouse tower was one of J.B. Nethercutt's private estates, serving dual purpose of a museum when he wasn't present, in which it was one of the largest houses in the United States at 60,000 square feet (5,600 m2). In 2000, the collection expanded with The Nethercutt Museum, a 40,000 square feet (3,700 m2) self-guided museum building.

The museum...

Power-to-weight ratio

Engines: Aston Martin Valkyrie V12". Cosworth. December 12, 2018. Archived from the original on December 7, 2021. Retrieved April 14, 2021. "Aston Martin Valkyrie"

Power-to-weight ratio (PWR, also called specific power, or power-to-mass ratio) is a calculation commonly applied to engines and mobile power sources to enable the comparison of one unit or design to another. Power-to-weight ratio is a measurement of actual performance of any engine or power source. It is also used as a measurement of performance of a vehicle as a whole, with the engine's power output being divided by the weight (or mass) of the vehicle, to give a metric that is independent of the vehicle's size. Power-to-weight is often quoted by manufacturers at the peak value, but the actual value may vary in use and variations will affect performance.

The inverse of power-to-weight, weight-to-power ratio (power loading) is a calculation commonly applied to aircraft, cars, and vehicles in...

List of automobiles known for negative reception

had previously designed notable cars, such as the BMW Z8, Aston Martin DB9, and Aston Martin V8 Vantage. It was met with mixed reviews; while its exterior

Automobiles are subject to assessment from automotive journalists and related organizations. Some automobiles received predominantly negative reception. There are no objective quantifiable standards, and cars on this list may have been judged by poor critical reception, poor customer reception, safety defects, and/or poor workmanship. Different sources use a variety of criteria for including negative reception that includes the worst cars for the environment, meeting criteria that includes the worst crash test scores, the lowest projected reliability, and the lowest projected residual values, earning a "not acceptable" rating after thorough testing, determining if a car has performed to expectations using owner satisfaction surveys whether they "would definitely buy the same car again if given...

List of Ford factories

30, 1941. G Aston Martin Gaydon Assembly Gaydon, Warwickshire England, UK Aston Martin DB9 Aston Martin V8 Vantage/V12 Vantage Aston Martin DBS V12 Sold

The following is a list of current, former, and confirmed future facilities of Ford Motor Company for manufacturing automobiles and other components. Per regulations, the factory is encoded into each vehicle's VIN as character 11 for North American models, and character 8 for European models.

The River Rouge Complex manufactured most of the components of Ford vehicles, starting with the Model T. Much of the production was devoted to compiling "knock-down kits" that were then shipped in wooden crates to Branch Assembly locations across the United States by railroad and assembled locally, using local supplies as necessary. A few of the original Branch Assembly locations still remain while most have been repurposed or have been demolished and the land reused. Knock-down kits were also shipped...
